LTG Bratton impressed with FED work

Lieutenant General Joseph K. Bratton, Commander of the Corps of Engineers and Brigadier General Robert M. Bunker, Commander, Pacific Ocean Division paid Korea a whirlwind three-day visit in mid-June. LTG Bratton made the trip to review FED activities as well as the Facilities Engineer and 2nd Engineer Group activities.

Accompanying LTG Bratton and BG Bunker were Kauk "Charlie" Cheung, Chief of POD Engineering, Everett "Tony" Flanders, Chief of POD Construction-Operations and OCE representatives Robert Ford, Major Brian McKenna, and Major Kevin Mahoney. Major McKenna is the Executive Assistant to LTG Bratton and Major Mahoney is an Engineer Staff Officer. Mr. Ford is Deputy Chief of Construction Division within OCE's Directorate of Engineering and Construction.

The visiting party arrived late on Sunday night, the 12th and were up early the next morning to begin a round of visits and briefings in the Yongsan area. By lunchtime, the district aviators, headed by Major Lynn Hayes, had transported everyone to Camp Humphreys where the 892nd Engineer Battalion hosted a lunch. Captain Bruce Pink showed LTG Bratton the recently completed dining facility as well as the new running track and ongoing building upgrade and airfield repair work.

The next stop on the itinerary was Osan Air Base where Howard Elliott showed off the fine work going on there. Before flying back to Seoul for the Engineer Ball that evening, LTG Bratton took a look at the new aircraft shelters, the shelter door work and the quick-turn shelter construction.

Tuesday morning the visitors came to the FED compound where COL Perrenot presented a briefing on FED activities before LTG Bratton addressed the employees. The General complimented the district on its fine work and asked the employees to continue the excellence that has established such a fine reputation.

The rest of Tuesday was devoted to a (Continued on Page 4)

District celebrates twenty-six years

From the first volleyball serve to the last cake auctioned the theme for the day was "fun." That pretty well sums up the happenings of last June 3rd at FED's 26th Birthday Party, Organization Day 1983.

The two survivors of a May lunchtime volleyball tournament, Design Branch, faced off at 10:00 a.m. to begin the day's events. Military Branch rallied and upset the perennial champs, by winning two games to one.

General Sennewald speaks

Soon after the 8th Army Combo Band, the East Orient Express, began entertaining the crowd with pleasing renditions of currently-popular songs, General Sennewald appeared and mingled with many of the district employees and their families. He was only expected to deliver the day's main address but did extra duty by presenting several employee service awards. In his remarks, he congratulated the district on 26 years of excellent performance and challenged FED to continue by designing and building structures that not only function well but also blend nicely with the natural beauty of the Korean land.

Dancing, Tae-Kwon-Do

Excellent demonstrations of Korean Folk Dancing and Tae-Kwon-Do provided the afternoon entertainment. The folk dancers were from the Su Yun Dancing Institute and the TaeKwon-Do children were from the Namsan Elementary school. A raffle and cake auction for the benefit of the Sung Ae Won orphanage climaxed the day's activities. The auction was a big success as COL Perrenot wore his vocal cords as auctioneer and several employees opened their wallets. The final cake to be sold featured an intricate and realistic construction scene, including even a project sign. It was donated by Mrs. Kathy Velga and was purchased by Marilyn Scott for $100.

When the partyers were not concentrating on the entertainment they could wander by the various booths that were set up. They could buy district memorabilia at the orphanage committee booth, win a prize at one of the many games, or just watch the fun at the dunking booth. Many of the district supervisors braved the icy cold water (though many cheated by wearing such things as helmets, hard-hats and raincoats) for the amusement of the crowd.

Of course, a successful affair such as this one does not happen without careful planning and hard work. The credit for that should go to many people but, in particular, Cpt. Laughlin (Aviation) and his Organization Day Committee, Wayne Kelly (Design Branch) who acted as bilingual master of ceremonies and Robert Scott's Repair and Utilities Branch deserve acknowledgement.
This page is intended for discussion of issues relevant to District employees. If you feel strongly about an issue and have an opinion you think will be of interest to others in the district, put it in a letter and send it to the Public Affairs Office.

**LTG Bratton, BG Bunker send congrats**

As we celebrate our 208th anniversary — in this bicentennial year of the Treaty of Paris, which established the peace following the Revolutionary War — we should take a moment to reflect on the excellence of the Army Corps of Engineers.

As the "Federal Engineer," we have always been where the nation needed us most. On June 6, 1775, the first Chief Engineer laid out the earthworks fortifications that protected the revolutionary soldier at Bunker Hill. In the 19th century, we explored, surveyed and mapped the west and provided much-needed navigation routes. In this century, we became the country's major water resource developer — a large nation-building mission that has given us a "ready reserve force" able to mobilize rapidly in time of emergency. Throughout our nation's history, in peace and war, engineer soldiers have served with distinction in support of the combat forces of the Army.

Today our work is no less challenging. In 1983 the United States is committed to — and deserves — an Army of excellence, and an Army of excellence deserves no less from the Corps.

The 208th Birthday of the Corps of Engineers finds us managing a massive construction program for the Army as it meets the challenges of the 1980s. We are striving to provide quality facilities and equipment to Improve the readiness and sustainability of the Army and to modernize its force structure. Our civil missions make us the nation's foremost builders and truly "Federal Engineers."

Each of these missions and a host of other growing responsibilities to the nation challenge us and demand of us that we continue to work with professionalism and integrity. In support of an Army of excellence, each of us can take pride in the fact that we can offer an organization of excellence — the Army Corps of Engineers.

**LTG Joseph K. Bratton**  
Commander  
US Army Corps of Engineers

Congratulations to the Far East District on your 26th Anniversary. The Far East District is accomplishing a mission which no other organization has the capability of performing. Over the past 26 years, the district's support to our U.S. Forces in Korea through supervision of military construction has been of strategic significance to our nation. In addition, the district's contributions to the Republic of Korea in the building of numerous facilities, the fostering of the local construction industry, and boosting the Korean economy are worthy of note.

As the Far East District observes its 26th anniversary in Korea, I convey to you, the men and women of the district, my best wishes and those of the rest of the Pacific Ocean Division organization for continued success in accomplishing your mission.

**BG Robert M. Bunker**  
Commander  
Pacific Ocean Division  
U.S. Army Corps of Engineers

Photos from left: General Sonnewald presents 25-year service award to Sin, Tae Won (Survey), Korean Folk Dancing and Tae-Kwon-Do demonstration.

**Briefs**

Congratulations to Capt Lee A. Stahl, Cpt. Christopher S. Prinslow, Cpt Bruce A. Fink and SPC Scott L. McCue on their recent promotions. Captains Stahl, Prinslow and Fink are the project officers at Pusan, Kunsan and Camp Humphreys, respectively. SFC McCue is the newly arrived Personnel Staff NCO in the Security and Troops Office.
Uijongbu's project office renewing Cp Red Cloud

Mike Heffernan's Uijongbu Project Office is certainly giving Camp Red Cloud its due these days. Currently, there are contracts totaling over $11 million that, when completed, will furnish the camp with new water lines, a new electrical system, new sewer lines and treatment facilities, and new barracks. In addition, many of the existing buildings are being completely renovated.

Although Camp Red Cloud is not the only camp Mike and his five-person staff are responsible for, it provides the great majority of the workload. However, several other camps, such as Stanley, Kyle, Essayons and Jackson, have FED work underway. There is, for instance, a new $2.1 million bachelor housing structure under construction at Camp Essayons. When all the contracts in the Uijongbu Project Office area are totalled, they approach $24 million.

Mike came to Korea last June after tours in Germany and Israel. He is assisted by Engineer Technician Richard Castro, General Engineers O, Sung Sik and Pak, Chol Pong, and Electrical Engineer Kim, Nak In. Ha, Yong Suk is the Clerk/Typist for the office.

Work on the $1.48 million sewer upgrade for Camp Red Cloud is being completed this month. The project includes placement of new sewer lines from the camp buildings and the construction of a new sewage treatment plant. The water upgrade work is costing about $1 million and should be completed this summer. The electrical work also should be completed by the end of the summer.

FED activity at Camp Red Cloud does not end with the completion of these current contracts. Several projects are planned there in the near future. For instance, a new entertainment center, auditorium, and warehouse are three of several new buildings scheduled to be built at the camp. In addition, the building renovation work will continue. It looks as though the Uijongbu Project Office will be busy for some time to come.

Photos counter-clockwise from left: Mike Heffernan discusses day's work with O, Sung Sik; Walkway over a part of the new sewage treatment plant; Workmen upgrading power system; Ha, Yong Suk handles paperwork; and the drying bed portion of the new sewage treatment plant is ready to go.

Nostalgic military ear

by Perrenot

The United States Army 100 years ago was scattered across the vastness of the American West, patrolling from hundreds of small forts, most of which have long since been forgotten. It was a dreary, harsh existence, for soldier and family alike. Contrary to the Hollywood version, it was not a life of dashing, sunburned men, prancing horses and fluttering guidons. The only excitement was the occasional attacks from remaining hostile bands of American Indians.

The only music generally available to the lonely military families was the fort bugler who divided and paced the days with his calls, from the bright crispness of "reheille" in the morning, through the various events of the day, to the mournful beauty of "taps" at night.

In the near future, you will begin hearing these old bugle calls on the FED compound. They are not in any way intended to signal anyone to do anything, but rather to render honors to our nations' flags and bring a little military nostalgia from the old west to our workday. So relax and listen to these bugle calls. Who knows, in your mind you may begin to see John Wayne and the 7th Cavalry galloping across the plains.

"By sections, at a gallop, Yo" Reveille (Rally Colors) — 0630 hours Work Call — Start of Workday US/Korean Music Selection (By request) — 1500 hours Chow Call ("Soup") — Beginning of Lunch US/Korean Music Selection (By request) — 1600 hours Call — 10 minutes before Retreat Retreat (Lower Colors) — End of Workday Taps — 2200 hours.

New deputy

LTC Walter D. Birchfield became the new Deputy District Engineer on June 15th. He comes to us from an assignment at the Combined Forces Command Headquarters, Yongsan where he served in his alternate specialty as a Foreign Area Officer. LTC Birchfield has previously served with the Corps in Japan at the Oki­nawa Area Office. Wife Naruko, daughters Naomi and Emily and son John are with him on his tour.
Chief of engineers visits

quick-moving tour of the northern area of the Republic. Included on the tour were 44th Engineer Battalion activities at Camp Mercer, a courtesy visit with the Commander of the 2nd Infantry Division, MG Johnson, as well as a review of Camp Casey projects with CPT John Seimer, the Rodriguez Range field training site and Camp Red Cloud. At Rodriguez Range, the 2nd Engineer Battalion demonstrated one of its combat engineer tanks. The Uijongbu (Camp Red Cloud) visit included a courtesy call on LTG Menetrey, Commander of the Combined Field Army and a tour of FED work there hosted by Mike Heffernan. Before leaving Uijongbu, LTG Bratton dedicated the new sewage treatment plant at Camp Red Cloud.

Wednesday morning LTG Bratton paid visits to MG Hudachek, the USFK/EUSA Chief of Staff and to General Kwang, Yung Si, Chief of Staff, Republic of Korea Army. At ROK Army Headquarters, he was received with an impressive Honor Guard Ceremony. A visit with General Sennewald was next on the agenda before lunch and a tour of area III projects in the afternoon. CPT Keating escorted the General through a tour of the Seoul American High School, the new elementary school and the new dental clinic.

A dinner at the ROK Army Officer’s Club Wednesday night concluded the activities of the visit. LTG Bratton and BG Bunker and party left from Osan Air Base early Thursday morning. LTG Bratton seemed favorably impressed with what he saw in Korea. At one point while viewing the Falcon Gymnasium at the Seoul high school he exclaimed, “This is as nice or better than are in the schools back in Virginia. It makes me glad to see that this is the kind of facility we’re building for the soldiers and their families.”

Colonel Perrenot discusses Camp Humphreys rehab project with LTG Bratton, BG Bunker and CPT Fink.

Howard Elliott shows LTG Bratton one of the new quick-turn shelters under construction.

DISTRICT HAPPENINGS

New FED faces

James P. Bowers is the new Assistant District Counsel in the Office of Counsel. He worked for the Veterans Administration in Washington, D.C.

Han, Man Hyup is also a Civil Engineer in the F & M Branch. He worked for the Seoul National University Soil Lab as a Researcher.

Dennis A. Fisher is the newly arrived Civil Engineer in the F & M Branch. He has come from the Galveston Engineer District.

Yi, I Chun is the new Mail & File Clerk in the Office of Administrative Services. He joined FED after being honorably discharged from the ROK Army.

Patty Boeckman is the new Secretary in Emergency Management Office. She comes from J-1 of the 8th U.S. Army.

Kwon, Min Cha is a Stock Control Clerk in the Property Accounting Office. She has come from Camp Humphreys.

Don Farquhar is a new Project Manager in the Office Engineering Branch. He has transferred from the Seattle District.

Cho, Yang Hyup is the new Estimator in the Design Branch of the Engineering Division. He has transferred from the Facility Engineer Activity-Korea (FEA-K).

Spring bowling completed

Tech Review Team "A" finished on top June 1st as the FED Bowling League wound up its spring competition. The team, composed of Yi, Chin Chol; Sin, Yong Taek; Song Tae Yong; Yang, Yun Chol; and Yi, Kyu Tong, finished with a 51-29 won-lost record. Song Tae Yong took the honors as top bowler with a 175 average. Yi, Kun Chang (Mech/Elec Team "A") and Yi, Sung Hyok (Structural Section Team) followed closely with 174 averages.

The best game bowled during the season was a scratch 265 by Yi, Kun Chang, Pae, Hak Su (Motor Pool) bowled a 268 with handicap. Stan Glatt (Military Branch) scored the highest scratch series, a 638 and Chon, Chung II (Tech Review B) bowled the best handicapped series, a 663. The next bowling league will begin on or about the second week in September.

Luncheon news

This month's FED Luncheon will be held on July 8th at 11:30 a.m. in the East Gate Club. The luncheon provides a congenial atmosphere in which to become acquainted, make new friends and to strengthen present friendships within our FED family.

Menu

1. Soup du jour sliced beef w/mushrooms steamed rice coffee or tea — $3.75
2. Soup du jour half roast cornish hen w/rice stuffing & white wine sauce mashed potatoes green vegetables coffee or tea — $2.75
3. Soup du jour chef's salad coffee or tea — $2.15
4. Soup du jour seoul burger w/french fries coffee or tea — $2.80

For reservations call Margie Postlweate 793-5713 or Sandi Cook 2917-492

OSA and EEO offer course

The Office of Administrative Services, in conjunction with the District Equal Employment Opportunity Program announces a Personal Profile System to be administered by Ms. Jane Baker, an instructor in Performax Systems International, Inc. on July 27 at 10:00 a.m.

The Personal Profile System will help you identify your behavioral style and what you can do to be more effective in your professional relationships. In the interest of promoting a more mutually satisfying and productive work environment, COL Perrenot is pleased to offer this scientific development tool to all FED employees; however, the class size must be limited to the first 25 to register. For more information, please contact Linda Payne, Office of Counsel, extension 492.
