EAST GATE EDITION
SEUL KOREA VOL. 1 NO. 8 OCTOBER 1983

Osan Air Base runway finished early

One of the biggest challenges FED has faced in recent years has been the 100-day renovation and improvement of the runway, taxiways and associated buildings at Osan Air Base. The critical project has now virtually completed with more than 100 days to spare. This has been done despite the occurrence of more inclement weather than had been anticipated.

Since August 1st, the entire runway has been repaired and overruns added to both ends. The main taxiway has been extended and new high-speed taxiway constructed, several other taxiways and the runway lighting system have been repaired and the control tower, and two Strategic Air Command hangars have been rehabilitated. Concurrent with this work has been the repair and improvement of the Military Airlift Command (MAC) terminal, which is about 80 percent complete. When that building is done, the people connected with the project will see a brand-new Korean-style entrance at both ends that will be a new baggage conveyor system.

All the work, exclusive of the MAC terminal project, totals more than $4 million and is being performed by the Pum Yang Company, limited under five separate FED contracts. The Korea Development Corporation is doing the MAC terminal work. Work has proceeded well despite less than ideal conditions. When the building is complete, incoming personnel will see a new high-speed taxiway and both incoming and outgoing personnel will enjoy the new baggage conveyor system.

A ribbon-cutting for this runway work has been scheduled for November 4th at the air base. Although most of the job is done, there is still much activity at the east end of the runway as Pum Yang workers put the finishing touches on the overrun there. A few workers can still be found at the west end, but the overrun there is virtually complete. Everything should be in good order by the time of the ribbon-cutting.

Of course, all the work at Osan, runway closure work included, is under the stewardship of Howard Elliot's Osan Resident Office. It is he and his staff that deserve the credit for this accomplishment. Several on the staff, however, deserve particular acknowledgement for their part in this effort. Captain Bergeret was the project officer and Kim, Yong Koo was the general engineer who handled many of the technical problems as they arose. Hyon, Chong Tok was the construction inspector who oversaw all the Pum Yang Company work. Yim, Kwang Chun is inspecting the Korea Development Company project.

The people mentioned above are only the most closely involved. Many FED employees participated in the planning, designing, and procurement process that made the various projects possible. Everyone in the district can count this one as a success.

(Photos on page 4 and 5)

New Casey med center started

FED's health facility program took another step forward October 12th when a ground-breaking ceremony marked the start of construction of a troop medical facility for Camp Casey. The $2.3 million, 23,000 square-foot building, being constructed by the Ssangyong Construction Company, is scheduled for completion by April 1985.

Maj. Gen. Henry Doctor, Jr., 2nd Infantry Division Commander, Colonel Perronot and Mr. S. J. Kim, President of Ssangyong, all spoke at the ceremony. Many people connected with the project then participated in a symbolic turning of the soil. The project has actually been underway since July as the ceremony was held on a helicopter landing area already prepared by the company, but work on the building has not yet begun. When it is finished, the building will provide Camp Casey medical personnel with excellent facilities for preliminary treatment.

The Camp Casey is the third major health facility to be constructed by FED in recent years. In March of this year, Yongsan welcomed the dedication of a new 18-chair, $1.37 million dental clinic on South Post. Just three months later, work was completed on a new OB/Gyn clinic at the 121st Evacuation Hospital on Yongsan. Neither is the program complete now. By the end of this year it is expected that a contract will be awarded for an $18 million, 103,000 square-foot medical and dental facility at Osan air base.

(Photos on page 3)

This artist's rendition shows what the new medical facility will look like when it is finished in 1985.
**PROSE AND CON'S**

This page is intended for discussion of issues relevant to District employees. If you feel strongly about an issue and have an opinion you think will be of interest to others in the district, put it in a letter and send it to the Public Affairs Office.

**Letter to the editor**

We who are in the business here at FED should have an excellent understanding of the planning, effort, and, above all, the enormous cost of constructing tunnels through the solid bedrock like Namsan mountain.

We at FED and everybody else who uses these tunnels should be and are required to help pay for this time saving convenience. There are toll booths at the ends of the tunnels where we are required to drop 100 won into a hopper or else get change from the attendant, no exceptions. Just because you are a foreigner is no reason to drive straight through waving at the attendant, no exceptions. Just because you are a foreigner is no reason for any other reason. Let a foreigner try that trick elsewhere.

The recently completed gymnasium at Camp Carroll is the latest in the FED Gym Construction Program.

**Briefs**

**PERSONNEL NEWS**

For those persons requiring travel orders or certificates of employment the technical services office (TSO) of Seoul CPO has requested all paper work be submitted within the following timeframes:

- PCS Orders — 60-90 days prior to departure.
- EML Orders — 2-3 weeks prior to departure.

Reemployment Orders — 45-60 days prior to departure.
Certificate of Employment — 3 days.

In emergency situations TSO will expedite processing but it must be remembered that for every person that receives expedited service other people must wait.

**CONGRATULATIONS**

To Spec. 5 Kurt Benya (Troops), who was promoted in ceremonies held September 30.

Casey ceremony  (from Page 1)

The ceremony took place in what will be the helicopter landing area. The facility will be built in the area in the upper right of the photo.

Maj. Gen. Henry Doctor, Jr., 2nd Infantry Division Commander addresses the group.

FED compound interests former students

Sixty-three Japanese tourists paid the FED compound a visit September 20th but they weren’t interested in Corps activities. They were here to see what we had done to their old school grounds. All the visitors were graduates of the Kyung Sung Educational School, a Japanese school for teachers that occupied the FED compound between the early 1920’s and 1945. Their stop here was the beginning of a four-day tour of the Republic of Korea.

It was a quick visit, lasting only about 30 minutes, but the tourists got a good look at the exterior of S-56 (F&M), S-62 (HQ), S-64 (temp HQ), S-67 (CEERIA), and S-68 (Old NRO building), the main buildings of the school. S-64, S-67, and S-68 were the dormitories and S-62 was the gymnasium building for the school. That explains the unusual lay-out our office buildings have. One of the visitors also explained that the large KOAX building was a primary school associated with the Kyung Sung school.

After their quick visit, the sixty-three Japanese expressed their gratitude to FED for allowing the visit and re-boarded their buses for the trip to the Shilla Hotel, where a welcome dinner was planned for them. The visitors, all retirees who were returning to see the land where they had spent their younger years, seemed to appreciate the opportunity to see the many changes that have taken place here.

Japanese visitors return to see their old school.

Sports

Bowling
Just past the midway point in the fall bowling season, the Civil Section team leads with a record of 19 wins and 5 losses. They have not lost a game in the past three weeks, but the Tech. Rev./S&I (17-7), Architectural (16-8), and Modifications (15.5-8.5) teams are all well within striking distance.

Song, Tae Yong (Mech./Elec.) has the highest average, 175, at this point in the season. Yi, Chi Chol (Tech. Rev.), Yi, Cho Yop (Survey), and Kim, Hyung Su (Civil/Drafting) follow closely with 173, 170, and 170 averages, respectively. Kim, Se Kon (Hyd./Const.) has the high game of the season, a 275.

Golf
Capt. Bruce Fink, playing in his last engineer family tournament before his departure, shot the low scratch score of the year for FED employees. His score of 80 led all players in the October 4th tournament. Ku, Chu So (Camp Humphreys) had the low net score, a 65, followed by Lance Toyofuku's (Military Branch) 66 and Kim, Sung Uk's (Mech./Elec.) 68.

Running
Stanley Glatt (Program Support) keeps running along. His latest race was the 8th Army Championship Marathon at Camp Humphreys, which he finished in 4 hours and 51 minutes. He was the sole FED representative.
DISTRICT HAPPENINGS

New FED faces

SFC Robert J. Marshall is a Construction Inspector at the Camp Casey Project Office. He was last assigned to Fort Benning, Georgia.

Yong Man Chon is an Accounting Clerk in Contract Administration Branch. He has come from the Young Bo Engineering and Construction Company, Seoul.

Vernon D. Foushee is an Engineering Technician in Construction Section, Office Engineering Branch. He has come from Fort Belvoir, Virginia.

Jae Yol Kim is an Editorial Assistant in Public Affairs Office. He has come from the Seoul Civilian Personnel Office.

Susan L. Grisco is a Clerk Typist in Office of Counsel. She has come from the 524th Military Intelligence Battalion, Seoul.

John Steinbeck is Deputy Chief in Construction Division. He has come from Norton Air Force Base, California.

Doris Quiene is a Procurement Clerk in Procurement and Supply Division. She has come from Bangladesh.

Richard G. Griffiths is a Supervisory Civil Engineer at the Camp Casey Project Office. He has come from Area Facility Engineer, Camp Giant.

Chandler McMahan is a Supervisory Management Analyst in Office Management Branch. He has come from the Yongsan Education Center.

Charles L. Crow is a Civil Engineer in Facility Engineer Support Section. He has come from Seattle, Washington.
