Fine weather made a
good backdrop for the ac­
tivities at the Sung Ae Won
orphanage on October 30th.
That was the day many
district employees gave up
their normal Sunday after­
noon routine to participate in
a picnic for the 80 orphans
who live there.

Sgt. 1st Class Scott McCue
(Personnel NCO) and his crew
arrived early to set up for the
days' activities. Lillian Per­
renot and Cathy Veiga had
done much of the prepicnic
day work by purchasing and
preparing the food. Most of
the rest of the FED par­
ticipants showed up a little
before noon to begin the pic­
nic.

Before lunch was served,
the children said their cus­tomary prayer and Lt. Col.
Birchfield made some

In his remarks, Colonel Perrenot
praised the efforts of the FED, Air Force
and Pum Yang personnel who worked so
well together on this project. The 100-day
construction period set for the work
demanded hard work and close coopera­
tion. From August 1st until the first week
in November, virtually the entire runway
and most of its taxiways had to be
repaired, the control tower and two
hangars had to be renovated and the run­
way lighting system had to be repaired.

In addition, new overrun
at both ends of
the runway and an extension to the main
taxiway had to be constructed. The con­
tactor worked nights and weekends to
complete the job on time.

Exactly 100 days from the start of
work, the planes were back flying again
at Osan Air Base. Once the renovation of
the Military Airlift Command terminal is
completed (probably in December),
operations at the base should be pretty
much back to normal.
This page is intended for discussion of issues relevant to District employees. If you feel strongly about an issue and have an opinion you think will be of interest to others in the district, put it in a letter and send it to the Public Affairs Office.

Chief's message on National Family Week

There was a time when the sentiment "If the Army wanted you to have a family it would have issued you one" was close to official policy in the Army. We have moved a long way since then, and growing sensitivity has replaced indifference. This year, in conjunction with National Family Week, November 20th — 26th, the Chief of Staff had committed the Army to observe these days as Army Family Week as well. He has issued a white paper called "The Army Family," outlining the Army's responsibilities to family members and setting the goal of forging a partnership between the Army and its families.

Army family week is important, because it demonstrates that the Army has come to recognize that people do not perform at peak efficiency when they are distracted by family matters. True concern for people also involves concern for their families and a willingness to help and to understand. This concern helps mold the character of any good organization.

These are lessons of which we in the Corps of Engineers — military and civilian alike — have always been aware. The Corps has long prided itself on being a family-oriented organization. In its broadest sense, the term engineer family has always encompassed the spouses and children of our work force. However, changing trends in the makeup of the traditional family unit and in the roles of its members should encourage us to broaden our definition of "family" still further as we reach out to show our concern for our colleagues.

As the Chief of Staff points out in his white paper, new modes of family life create new needs and expectations, and may result in new kinds of stress. Even more dramatic is the change in some family units as women aspire to careers of their own outside the home. Our increasingly fast-paced, mobile, success-oriented society puts still more pressures on the family. We should not be too surprised if these pressures occasionally surface at work.

I urge those of you who are supervisors and managers to help your co-workers cope with on-the-job problems caused or aggravated by family pressures. The Corps' employee assistance program is also available for this purpose. More important, we should all join in making sure that working conditions foster and not inhibit healthy family relationships and activities.

I encourage all of you to make your own family a top priority in your life and to demonstrate to those with whom you work that the Corps cares for the many individual families which comprise the "Corps family" of which we have always been so proud.

J. K. Bratton
Lt. Gen., U.S. Army
Chief of Engineers

Parking at a premium at Far East Dist.

Help! As is apparent to anyone who has driven to the FED compound a little late in recent mornings, parking has become a very scarce commodity. The ongoing renovation program has taken much of the available space and as it continues, even more space will be needed. Your cooperation is desperately required.

In coming weeks, you are bound to arrive at the compound only to find there is simply no legal place to park. Why not consider now the alternative means of transportation? The best solution, considering that many of the American employees live in the same areas, may be carpooling. Of course you may feel it is easier to follow your own individual schedule, but joining a carpool at least for the construction period would certainly help things here.

Consider also the new subway line. There are now two stops that are within a block of the compound. Especially, if you live south of the Han River it may be a real bargain for you. It is about a 30-minute ride and costs less than $10.00 a month. It is a pleasant ride and offers an hour a day for you to catch up on your reading.

Of course there are other means such as buses and taxis, whose convenience varies according to your location. If you are not aware of the routes and timetables, you need only ask a few questions to the right people. Your help is needed now. After all, what option does the district have but to start issuing tickets to those who create unsafe conditions by parking in restricted areas?
Corps is busy at Camp Casey office

When Capt. Richard Adams replaced Capt. John Siemer last summer as head of the Camp Casey project office, he inherited one of the busiest offices in Korea. The Casey project office averages about $15 million a year in operations and maintenance (O&M) work and has just completed a $45 million FY 83 military construction program. This year will be little different as $30 million of new construction is expected in the 2nd Infantry Division area.

The O and M works primarily involve rehabilitation of the barracks, mess halls and office buildings. The recent O and M program there has renovated over 60 percent of those buildings. The largest part of the new construction work involves construction of two-story bachelor enlisted quarters and tactical equipment maintenance shops. New dining facilities, gymnasiums and utility upgrades also make up the new construction program. Of course, one major project is the recently-started $2.3 million Camp Casey troop medical center.

Capt. Adams has a 11-person staff to accomplish all this work. Dick Griffiths recently came over from Camp Giant Facilities Engineers to fill the supervisory civil engineer position and Sgt. 1st Class Robert Marshall has filled the construction inspector slot. Terry Wotherspoon is the construction representative.

The general engineers for the office are Kang, Chol Won; Yang, Song Hui; Yi, chang; Yi, Kon U; and Yi, Yun Hak. Pak, Yong Nam fills the civil engineer spot. Kim, Kyoung Son and Debra Shears fulfill the clerical and typing duties in the office.

With Capt. Adams’ staff at Camp Casey and Capt. Durham’s office at Camp Giant, FED has fine representatives in the front line area.

FED, POD, AE’s at Eng. conference

Design of military construction projects was the prime topic last November 14th and 15th when Engineering Division got together in the Seoul Garden with the local architect-engineering firms and POD Engineering Division representatives. Kiak “Charle” Cheung, Akira Soma, and Young Chen were the POD employees present.

Thayne Coffin, Chief of FED Engineering, opened the conference with welcoming remarks before Col. Perenot gave a presentation on the “FED Engineering Team.” He was followed by Mr. Cheung, Chief of POD Engineering Division, who spoke on “The Pursuit of Engineering Excellence.”

Before the lunch break, Mr. Sameshima discussed design strategy, gave an update on materials and criteria, and commented on hospital design and interior design. After lunch, Mr. Chen finished up POD’s portion of the program with a discussion of a Harris Computer design program that is suitable for military construction.

Bobby Williams, Chief of FED Construction Division and Henry Birchard (Design Branch) gave afternoon presentations. Williams spoke on recurring design problems in active construction contracts and Mr. Birchard gave an account on the architect-engineering firms’ responsibility in preparation of construction cost estimates.

The second day, November 15th, was devoted to architect-engineering concerns. Bill DeKeyser, Chief of Combined Defense Construction Management section, spoke on the design of Host Nation (Combined Defense) projects by the architect-engineering firms. Pat Bowens (Office of Counsel) then gave an update on the firms’ liability in case of design errors and omissions. The rest of day was concerned with POD and architect-engineering firm matters as Mr. Sameshima spoke on POD’s review responsibility in preparation of construction cost estimates.

After all the issues were thoroughly discussed, the attendees adjourned for a conference-ending cocktail party.
Children enjoy autumn outing

Take my picture, please.

Big hot dog for little kid.

Bottoms up.

George Oelschlegel (Contracts) with some of his friends.

Dee Dee Chuidian (Procurement) passes out sodas.

"Mugging" for the camera.
November 1983

From left to right: Members of the winning Civil/Drafting team, Kim, Hyong Su, Yu, Pyong Kwon, Choe, Kwang Kyu, Yu, Pyong Ki.

Golf

Duffers still playing

Several FED golfers braved a cool rain on November 15th to compete in the month’s Duffer Tournament. Kim Hak-Chang of FEAK and Kim, Kwang-Ku (Fac Eng Sup) both had the low net score, a 65, but Kim, Hak-Chong won on the basis of a lower handicap. Dennis Fischer (Survey) had a unhandicapped 85 to take the medalist title. Chong, Yong-Kwan (Canst. Admin.) had the third low net score, a 66.

The next outing, on December 6th, will be the final tournament of the year.

Bowling

The Civil/Drafting Section team easily won the fall bowling title with an impressive 9:1 wins to 9 losses record. These teams, Architectural, Mech./elec. “B” and Tech. Rev./S and I, tied for second place with 24-16 records. The winning team grabbed the lead the fourth week in the season and led the rest of the way.

Four bowlers, Song, Tae Yong (Mech./Elec.); Yi, Cho Yop (Survey); Yi, Chin Chol (Tech. Rev.); and Yi, Won Ho (Civil/Drafting) tied for the highest average (170) for the season. Kim, Kwang Ku (FE Sup.) had the highest three-game series (696) for the season and Kim, Se Kong (Hyd./Const.) had the high game, a 271.

The league finished up playing on November 16th. The next league should be starting in January.

New FED vehicles arrive on compound

The long-awaited replacement of the district’s aging fleet of vehicles has begun to occur. During the week of November 7th Major Lynn Hayes’ aviation section transported the motor pool drivers to Pusan to pick up the 60 new vehicles that are being assigned to FED. The list of new vehicles includes 21 3/4-ton vans, 7 1/2-ton vans, 10 one-ton pick-ups, and 22 1/2-ton pick-ups. Fourteen more are expected in the near future but the type is not yet known. In addition, the district has received a new 2,400-gallon fuel truck.

This replacement has come none too soon. Over half of the district fleet is either older than the specified age for disposal or has more miles than is specified for disposal. Fifteen of the nineteen district sedans are overage or overmileage and nine of the ten district station wagons are in that condition. All nine of the 1-ton crew-cabs assigned to F and M branch are also in that condition.

Justifications for the number and type of vehicles each section of the district needs are now being received. After these justifications have been carefully considered, the new vehicles will be distributed.

FED Christmas Party . . . . December 16th
극동지구 공병단 성애보육원 위문

지난 10월 30일에 있던 설사에 의해 트럭은 화장판 냄새가 침투한 오랜동안으로 더욱 잔뜩한 현상을 보였다. 그러나 대부분의 공병단 관리자들은 각자 일정히 오랜 여가기를 염두에 두고 있었음을 알고 있었다. 전문의 교육용 병원은 소풍이 시작된 정오 조금에 도착하였다.

정성 식사관에서 어린이들은 예의복 한 기도를 쓰고 Birdfield촌으로 운송창 입장을 하였다. 식사가 끝난 후 어린이들은 그곳을 떠나 이들에 대한 방문의 마당으로 몇 봉사 해주자들 간단한 촉각공연을 했다. 모든 어린이는 식후의 운동을 통해 어린이들과 이들이 즐거움을 즐겼다. 파티는 공병단장가족들이 이어가 시킨 오랜 3시경까지 계속되었다. 그러나 병사 크리스마스 파티가 12월 말 East Gate Club에서 다시 있을 예정이며 공병단과 어린이들이 다시 만나는 날은 그리 멀지 않은 것이다.

이번 기념 교육을 위한 소풍에 참가한 사람들은 Jody Shattuck, Bruce Swarthout 이외에도 저자 John Hom, Charles Bohemwan, 애스턴(Jason EOM), Jean Bloom, George Oelschlegel, P&S, Dee Dee Christain, Sharon Williams 등이 참가하였다. 그 외 병병 관계자들의 부인과 어린이들도 참가하였다.

오산비행장 보수 100일만에 완공

최근 두근두근한 노동으로 석공직으로 향한 오산공군기지 보수공사는 지난 11월 4일 벌써 100일째를 열어 공공어가 거행됨으로써 공식적으로 종료되었다. 가장 짧았던 시로 하여 준공시기동에 많은 힘을 기쳤으나 정부 편위 개입과는 조개같은 환경을 녹화하는 행정을 보내주는데 특별히 성공을 돌이킬 수 있었다. 제레임 외부 활동말 끝에서 거행된 준공식은 벌영님의 머리 사람들의 환영사로서 시작되었으며, 이어서 Perrenot 대령과 51기준부대봉사단 사령관 Howard 대령의 축사가 있었다. 문바이 공사와 관련되었던 모든 인사들이 편이를 걷는 교통사에 참여함으로써 준공식을 마쳤다.

Perrenot 대령은 축사에서, 공공어, 공공, 벌영님의 모든 근무자들에게 협조가 잘 이루어졌던 것을 이찬했다. 사신사 8월 1일부터 11월 첫째까지 모든 헤드로 아레 안정된 taxiway (본활주로에서 탄하십시오)의 보수, 전복배 2장의 임시교육 및 헤드로 조명시설공사, 이모토가 허락되어야만 했다. 그리고 황후도 양쪽방의 새로운 overran(본활주로 양쪽방 선정된 보도주행)과 본taxiway의 안정된 본활주로도 바꾸어주었다. 방향성들은 폐쇄공사를 꾸준히 해주며 장소를 바꾸고, 그리고 주변에도 지속하였으며 막강한 공세가 100일만에 완공된 것을 만든 주로 성공을 회의하게 될 것이다.
