Fiscal Year 1984 ends; Big Year ahead

As the clock struck midnight on September 30th Fiscal Year (FY) 1984 ended and FED employees breathed a sigh of relief. For the fourth year in a row, the district has implemented a program in excess of $250 million. The FY 84 program totals $285 million, including about $151 million in military construction projects, $51 million in operations and maintenance work, $46 million for the Host Nation program and $17 million for other programs.

Of course the ending of FY 84 only brings on FY 85 and the district has another big job ahead of it. The FY 85 program contains a large increase in military construction projects as approximately $216 million is tentatively allocated to this program in Korea. This would be the largest military construction workload in FED’s history. The total program for FY 85 is estimated at approximately $317 million, the second biggest year for FED with only FY 82 ($331 million) being larger.

It takes people to do all this work so we will notice an increase in the number of employees on the compound and in the offices around the Republic. The district is now authorized to employ a total of approximately 700 people, including about 430 Korean National employees and 280 U.S. civilians. The Korean positions are mostly filled but many U.S. civilians will be needed to take the authorized positions. More than 35 people have accepted offers for the U.S. permanent jobs so they will be arriving this month and next. Because they will still not fill the need the increase in employees will not doubt continue through next spring.

The district is in a better posture than in years past as its percentage of temporary employees has been significantly reduced. A recent increase in authorized Korean National permanent positions has allowed the district to cut its percentage of temporaries from 30% almost down to 20%. This should provide for the type of stable workforce that will be needed to accomplish the huge workloads the district is faced with in the coming years.

Although the workload is large and the challenges are many, employment with FED continues to be an interesting and exciting experience.

“This is extremely gratifying to me to congratulate each and every one of you for your team-type efforts in accomplishing our total program throughout FY 84. The many achievements in every facet of our year’s work have now culminated with the contract awards so that we may continue our tasks next year.

What you’ve done has been important to the FED Team’s success — whether it be driving, designing, assuring, reviewing, flying, coordinating, typing, cleaning, drilling, programming, printing or supervising — it’s all been done well. I appreciate your cooperative attitude and professional performance. Thanks again!”

Col. Larry B. Fulton

FED replacing Tactical Equipment Shops

The tactical equipment maintenance shop has been one of the mainstays of FED’s military construction program for the Army in recent years. Since the new shops were first funded in Fiscal Year 1981 FED has overseen more than $25 million worth of construction of these buildings. 16 have been completed and another 27 are in various stages of construction now. Most are located in the 2nd Infantry Division area although one has been finished on Camp Walker in Taegu and one is just getting underway on Yongan. In the upcoming years, a few more shops are planned in the 2nd Division area as well as other areas of the Republic.

The new shops are replacing some aging and inefficient maintenance facilities that made life difficult for the soldiers who had to keep the tactical vehicles well maintained. The new facilities include heating systems and large, overhead rollup doors at the front and back which ease the entry and exit of the vehicles. Most have two or three bays, a pit for working underneath the vehicles and an overhead lifting device. A cement block office area is usually attached to the side of the prefabricated metal shop.

Construction of these maintenance shops is just another way FED is working to better the living and working conditions for the U.S. Forces and thus improve their readiness for combat.
PROSE AND CON’S

This page is intended for discussion of issues relevant to District employees. If you feel strongly about an issue and have an opinion you think will be of interest to others in the district, put it in a letter and send it to the Public Affairs Office.

Voter info

One of the fundamental rights and responsibilities of every U.S. citizen is to vote during local and national elections. To ensure that every soldier, civilian employee, and family member is afforded the opportunity to cast his or her vote in the upcoming Presidential Election, an extensive effort is being made to identify potential voters within the District.

To assist in this effort, FED has two Voting Officers:

CPT Mamura ext 3917-413
SFC McCue ext 2917-400

These voting officers will have all the needed information and materials to enable all personnel to register and vote this forthcoming November.

Don’t let this election year go by without exercising your right to vote. Remember, every vote counts, and yours could make the difference...

So see your Voting Officer TODAY!

District news

Ration control

The Ration Card office asks that you come to them a couple of months before your ration card expires. That way you will not need a temporary card while you await receipt of your new card. It also has information on job vacancies in the Corps of Engineers as well as the other agencies of the U.S. Government. Check the library also if you are interested in Korean National positions as a file is kept of vacancy announcements for them. If you vaguely remember some item you saw in the Yongsan Garrison Bulletin and want to look it up it’s available to you in the library.

FY 84 FINALS

FED Personnel & Families are invited to
The Sung-Ae Won Orphanage
Open-House/Picnic
Oct 13 (Sat)-Bus will leave FED at 10 a.m.

Briefs

Congratulations to Major Kevin Lee (Camp Giant) who was promoted in ceremonies held September 20.

Congratulations to Major Gregory Bergeret (NAO) who was promoted during ceremonies on September 28.

Congratulations to Capt. David Dawley (Camp Humphreys), who received the Meritorious Service Medal on September 24.

Congratulations to Maj. Rollie Edwards (Troops/Aviation), who received the Meritorious Service Medal on September 28.

Congratulations to Cho, Yang Hyup (Design Branch). He received a plaque of appreciation for his work at the Camp Humphreys Area Facilities Engineer Office, his previous employer. The plaque was signed by Yoon Sung Min, Minister of National Defense for the Republic of Korea Government.

Normal office hours returned to a winter schedule (8:00 a.m. to 5:00 p.m.) on October 1.

FED Christmas Party will be December 21 at the Seoul Garden Hotel.

The Sung-Ae Won Orphanage.

District Engineer .................. Col, Larry B. Fulton
Chief, Public Affairs ............... H. Ross Fendler
Editorial Assistant ............... Kim Jae Yul
Lt. Gen. Heiberg assumes command

As Chief of Engineers, Lt. Gen. Heiberg will have the principle responsibility for the development and management of water resource programs in the U.S., which include navigation, flood control, hydroelectric power generation, water supply for municipalities and industries, and recreation at Corps of Engineers' projects. In addition, he will be responsible for military construction for both the U.S. Army and the U.S. Air Force in the U.S. as well as overseas; he will also serve as the executive agent for the Army's worldwide facility engineering activities.

Lt. Gen. Heiberg was nominated by President Reagan to become Chief of Engineers on May 11 of this year. His career to date includes service here in the Republic of Korea as well as Germany and Vietnam.

FED-Air Force cooperation works

The excellent rapport which exists between FED and its customers was demonstrated recently when Col. Thomas E. Lollis, Director of Engineering and Construction at the Pacific Air Forces (PACAF) Headquarters in Hawaii wrote a letter of gratitude to Brig. Gen. Bunker. The occasion for the letter was Col. Lollis' departure from his assignment and in it he spoke of his "fond memories of my association with the Corps of Engineers personnel in Hawaii, Japan, and Korea."

The major FED Air Force project during Col. Lollis' tour was the 100-day repair and improvement of the Osan Air Base runway. Because the timing was critical (due to the closure of the runway), close coordination among FED, Osan Air Base and PACAF personnel was imperative. Col. Lollis speaks of teamwork in his letter and it was that teamwork that made the Osan improvement project a success. The job was done with a few days to spare and the runway was reopened right on schedule.

In particular Col. Lollis thanked Corps personnel for helping him with billeting and transportation arrangements and making him "part of the team." He pays the Corps a compliment when he says "your organization has supported our programs and never said 'no' when we needed help... This positive, professional approach to job accomplishment has been both refreshing and rewarding."

Letters such as this one, while a pleasure to receive, are, more importantly, proof that our hard work does not go unnoticed.

Make Your Suggestion today

First: Identify the problem. What is the present practice, system, or item being used? Next: Explain the proposed solution. What changes or improvement is suggested? Then: Point out the benefits. What savings or benefits will result? If you have any problem solving or cost savings idea, please write it down on DA Form 1045, submit to Incentive Awards (IA) Section, Seoul CPO, APO San Francisco 96301, and receive a felt-tip pen.

Do you need help?: If you desire help in writing your suggestion or putting it into words, you may ask your supervisor or contact the IA Section, Seoul CPO.

FED contractor personnel are shown at work at Osan Air Base in October 1983. They are constructing a new overrun area for the runway, part of the $6.7 million repair and improvement job there. This critical Air Force project was successfully completed through good FED-AF cooperation.
FED awards large Fiscal Year 84 program

Below: Chon, Yang Man (Cont. Admin.) prepares documents.
**Busy fall season begins for FED**

**Softball**

After a successful spring and summer season, FED has entered a team in the Yongsan Area Fall Softball league. After three games, their record stands at 1 win and 2 losses. The new season started out well as the FED’ers took the initial game from the Air Force Element 7-2. The following day (Sep. 16), they dropped a 16-6 game to the MED-COM team. The game was close even in the late innings but a 9-run rally by the signal team in the 5th inning sealed the victory. There are several games left so the FED team has a good chance to improve its record. Play is expected to continue through the second week in October. All games are being played on Yongsan South Post field #6 across the street from the new elementary school.

**Lunchtime Volleyball**

The spring lunchtime volleyball play has proved so popular that this year a fall volleyball league has been formed. Teams are representing Procurement and Supply Division, Design Branch, Foundations and Materials Branch, Headquarters, and Military Branch. They have been playing throughout the last half of September and will finish up with playoffs during the first week in October.

**Golf**

Kim, Kwang Ku (Fac. Engineer at Command Post, Main. FED personnel in Seoul simulated exercise play through staff elements points-of-contact.

Col. Larry Fulton (FED Commander), Lt. Col. Walter Birchfield (FED Deputy Commander) together with Maj. Michael Connolly (Aviation Commander) observed and offered guidance as the following personnel participated in UFL-84: Roger Rodriguez (Aviation Commander), Operations Officer; Patty Boekman (Aviation Commander), Operations Officer; Spec. 5 Anthony Truitt (Troops Office) provided administrative support; Kenneth Johnson (ED), Robert Moody (ED) Nicholas Neville (CD) and Carol Alexander (CD) served as FED Main staff.

Maj. West Tracy and Capt. Salvatore Cremona, Individual Mobilization Augmentee (IMA) Army Reserve Officers on active duty for training, served as Liaison Officers for the SFK Engineer at Command Post Main. They were preselected to perform in these capacities during mobilization.

Capt. Henry Miyamoto and Maj. West Tracy, both IMAs, served as Liaison Officers in UFL-84 and received the Army Achievement Medal for their outstanding performance of duties last year.

In addition to the exercise play in Taegu and FED Compound in Seoul, a noncombatant evacuation operations (NEO) exercise as a part of the UFL-84 scenario was played. FED employees, on a volunteer basis, reported to their processing centers with NEO card, shot records, passports, inventory of household items, finance papers for emergency payments and an emergency packet ready with necessary items for personal use to sustain their families two to five days.

Many valuable lessons learned during the exercise will be incorporated in FED’s contingency plans. Roger Rodriguez would like to thank everyone in FED who contributed to UFL-84, especially Staff Sgt. “Dusty” Boekman who did a fine job of ensuring that all message traffic moved smoothly between FED Main and FED Seoul. He would also like to thank the Southern Area Office for all the support they gave in setting up the FED Main Office. A special thanks to Kenny Gardiner, who gave up his office air conditioners to the EOC at FED Main (Temperatures had reached over 100 degrees with humidity factors of over 95% at the onset of the exercise.)

The total district support contributed significantly to the district’s success in the exercise.

**FED plays role in Ulchi-Focus Lens**

FED personnel were closely involved in Exercise Ulchi-Focus Lens 84 (UFL-84), which was played August 17 through August 30. This important exercise which is the largest command post exercise (CPX) in the free world is an essential tool in ensuring our preparedness to go to war. It was designed to exercise all the appropriate plans for a combined defense of the Republic of Korea. UFL-84 was a CPX, which involves the administrative implementation of plans rather than a Field Training Exercise (FTX) which measures results of tactical engagements.

UFL-84, played against a December scenario, is the ninth in a series of joint/combined ROK-US CPXs. During the exercise a 24-hour Emergency Operations Center was activated in FED Main, Taegu. A Liaison Office was established with the U.S. Forces Korea (USFK) Staff. They would like to thank the Southern Area Office for all the support they gave in setting up the FED Main Office. A special thanks to Kenny Gardiner, who gave up his office air conditioners to the EOC at FED Main (Temperatures had reached over 100 degrees with humidity factors of over 95% at the onset of the exercise.)
