FED hosts Sung Ae Won spring picnic

It began as a day when adults planned to create a fun-filled environment for children. When it ended, shortly before nightfall, there remained a good deal of debate as to whether the day had gone as planned, or whether the adults had become like the children.

"It" was the spring picnic hosted by the Far East District, with more than 100 orphans and orphanage workers as guests of honor. The picnic was held May 18 at the Frontier Club picnic area on Yongsan's South Post. More than 20 Corps' employees turned out for the Sunday afternoon festivities that included all the trimmings of an old fashioned American picnic, and more.

The traditional elements were there: hot dogs, hamburgers, chicken sizzling on the grill, chips, and gallons of soda to quench the thirst.

FED folks took turns at the grills, the picnic tables, and the ice chests, while others were engaged in serious games with the children, who ranged in age from 3 years to 18 years.

The games were many, but the premier event was volleyball. The contest pitted joint orphan-FED employee teams, and ended in a virtual draw. Officials say they couldn't identify the winner, because the two sides were both having such a ball.

Col. Larry Fulton, District Engineer, presents each of the youngsters with a blanket purchased with orphanage committee funds.

Customer care - professionalism and integrity

By Ed Tohill  
Construction Division

Lt. Gen. E. R. Heiberg III, USACE Commander has established "Enhance Leadership Climate" and "Develop Professionalism" as two of his command goals for FY86. I am confident that we in Construction Division will continue to support these goals in all of our endeavors as we go about our daily business. It is absolutely essential that each aspect of each of our duties be performed in a truly professional manner and be consistent with the laws and regulations which apply. This will protect not only your integrity, but the reputation of FED and of the Corps of Engineers.

Customer care is a very broad term and must be understood by those trying to effect customer satisfaction. One question which often arises is — "Who is our customer?" In addition, customer care often works against some of our MBO goals such as cost and time growth, contract closeouts, and 5 percent behind schedule. User requested actions may also challenge our professionalism and integrity. The following are excerpts from a presentation made in EUD, however, changed slightly to apply to FED.

Customer Satisfaction

In dealing with customers, we must be aware of, and be guided by, the legal and ethical constraints placed upon us. These constraints are all spelled out in current policies and regulations. In our relations with customers, we must balance our "zeal to please" with professional awareness — and we must resolve conflicts quickly without compromising our offices.

Conflicts and pressures will arise. When they do, you must insure that all FED people know and feel comfortable that they can bring the circumstances surrounding the situation to the attention of their supervisors. In this manner, proper action, can be taken in a timely fashion.

Customer satisfaction is one of the principal measures of our success and performance. I have heard comments that it is so important that it is an excuse for poor management, for bad engineering decisions, and/or for marginal or outright illegal contract administration. It is one of these. While it is very important, it can never be considered as the basis for inappropriate decisions or acts.

My position on the matter is clear: Customer satisfaction is a positive relationship with those we support — which is created by providing timely, reasonably priced, quality, and legally and procedurally appropriate construction and engineering services.

The use of available expertise

Each of us has definite individual responsibilities. On occasion each of us feels that the weight of the world rests solely on our shoulders. This is not the case, and failure to use the expertise available to us in FED can result in problems whose implications may be felt long after the incident.

(Continued on page 3)
Corps celebrates 211th anniversary

If ever there were a month and a year to point out the Corps of Engineers' dual responsibilities to fight the nation's wars and maintain the nation's waterways, this is it.

On June 14th, we celebrate the Army's 211th anniversary. On June 16th, we celebrate the Corps' 211th. On the 22nd, we celebrate the golden anniversary of the Flood Control Act and on the 23rd, a special ceremony at Fort Belvoir, VA, establishes the first "Corps of Engineers" regiment.

The Army's and the Corps' history is the history of our nation. General George Washington's Chief Engineer — Richard Gridley of Massachusetts — was one of the few colonial engineers with expertise in battery and fortification design and construction. Washington was in dire need for more engineers in the Continental Army and ended up petitioning Congress to get them from Europe — the center of technical education in Europe. They were very young then and we didn't have the expertise we needed.

This month, more than 25,000 active engineer officers and enlisted soldiers and 70,000 reserve and national guard will be unified for the first time in the new engineer regiment. This regiment strengthens the dual sense of affiliation that combat engineers feel to both the Corps as a whole and to their battalion, the basic and working fighting element.

Today's strong engineer force remains steadfast in our battlefield mission as part of the combined arms team, and in our engineering mission to support the Armed Forces.

Our dual affiliation with the nation's civil works rests on our ability to prevent events that pose a menace to national welfare or upset the orderly democratic process. More than 200 years ago, we were foremost in establishing the nation, and now we direct our energies to maintaining that nation.

Just before World War II, President Roosevelt summed up our national vision in his speech to Congress, when he spoke of the four freedoms — of speech and expression, of worship according to our conscience, and from want and from fear.

We and our democratic allies are unique in the world in believing that the first two freedoms are worthwhile in themselves, not only for each of us from his own standpoint, but for our fellow citizens who may disagree with our opinions or may worship differently. We also observe, looking about the world, that the realization of the second two freedoms seems to be dependent on the observance and exercise of the first two freedoms.

Most of the world does not share in these four freedoms, nor attaches such a value to them in combination.

The primary function of the Army and of the Armed Forces as a whole is to protect our free society against quite real external threats.

From the beginning, the Corps of Engineers has had a dual sense of affiliation to the Army as warriors, and to the nation as builders and protectors.

The Corps' values build on the Army's values of courage, commitment, candor, competence, and selfless service. Whether we wear a military uniform or civilian clothes, we share in a vision of a just society — a vision of the future that our citizen-soldiers summed up in the Constitution and its Bill of Rights.

As Army employees and as citizens, we play a dual role in protecting and nurturing a free and just society. To celebrate these anniversaries is to celebrate the survival and growth and durability of our commitment to a strong, and proud, and free America.

Fourth of July Message

From the President

The Independence Day we celebrate this year is special. This July 4th, in New York Harbor, we will rededicate a refurbished Statue of Liberty — that grand and glorious symbol of liberty and hope — which for the last hundred years has greeted millions of immigrants. She has welcomed them to a new land and a new life, where the darkness of privation and oppression gave way to the sunlight of opportunity and liberty — the freedom to speak and write and worship and achieve.

As we celebrate this two hundred and tenth anniversary of our Founding Fathers' Declaration of Independence, we are reminded once again that it is the gallant men and women of our Armed Forces who have maintained and sustained the liberty we prize, a liberty that generations of patriots have won for us with their courage and sacrifices. Because of your dedication and commitment to defend America against all its enemies, we still enjoy those precious rights, and the Statue of Liberty remains a beacon of hope for people throughout the world who yearn for freedom.

On this special Fourth of July, I am especially proud to serve our nation as Commander In Chief of such splendid forces. Nancy and I salute you and join all of our fellow Americans in wishing you and your families, here and abroad, a safe and happy Independence Day.

Ronald Reagan

Congratulations

In a special telephone call to Brig. Gen. Ryan, Commander, Pacific Ocean Division, Brig. Gen. Robert Bunker (Former POD Commander) extended his "Heartfelt thanks and appreciation to each and every member of POD for his selection to Major General. POD will always be a special place for the Bunkers."

Michael Maples receives certificate as POD's nominee for Outstanding Federal Employee of the Year — the Exceptional Community Service Award.

FED supports
1st Signal Brigade
By Craig Leiby
FEES
In June 1985, Facilities Engineer Support Section (FESS) negotiated an AE contract with Lyon Associates Incorporation/ Yoo Shin Engineering Corporation for drafting of plant-in-place drawings in support of 1st Signal Brigade. The project basically consists of drafting 950 D-size mylars based upon information provided from field investigations conducted by 1st Signal Brigade for 59 communications sites stretching throughout the entire Republic of Korea. The signal sites include microwave, technical control, communications centers, dial central offices, switching offices, air traffic control facilities and American Forces Korea Network transmission sites. This project has reduced over one year’s backlog of drafting work for the 1st Signal Brigade’s Configuration Management Office.

With the first contract recently being completed, 1st Signal Brigade has requested that another contract with Lyon Associates be initiated to complete the drafting of up to 30 additional sites. By the completion of the second contract, FESS’s customer will have finished a three year plant-in-place baseline program which will accurately depict communication facility and equipment layouts as well as other pertinent electronics information for virtually all major communication sites in South Korea.

The installation support provided by Far East District Engineers has proven to be vital in the high quality and timely completion of 1st Signal Brigade’s program.

Customer care
(from page 1)
Consider first the chain of command within Construction Division. Section, Branch and Division Chiefs are here as consultants. We also have competent personnel who function as our Executive work force. All these people provide guidance that is ethical and that accomplishes our goals within legal constraints. The elevation of problems is a key aspect of appropriate management. Management cannot function effectively if they are unaware that problems exist. It’s your responsibility to seek assistance at the appropriate time.

In closing, I found the above excerpts very appropriate to developing maximum leadership and management philosophies to carry out our construction mission in Korea.

Leaders in Customer Care

New Central Area Office family
Standing (L-R): Song Tae Yong, Mechanical Engineer; Yi Kyu Tang, Civil Engineer; Harvey Robinson, Area Engineer; Capt. Keith Stelzer, Deputy Area Engineer; Donald Wilson, Civil Engineering Technician; Yi Sung Hyok, Civil Engineer. Sitting (L-R) Kim Tong Chen, Electric Engineer; Jeannette Willson, Clerk Typist; Kang Nae Hwa, Procurement Clerk. Not showing: Frank Kislan, OEB Chief; Linda Fletcher, Clerk Typist; Pak Hyang Suk, Secretary.
Sunday afternoon festivities with youngsters

(Continued from page 1)

A pair of visitors to the picnic site were instrumental in making the picnic more than a picnic. FED Commander Col. Larry Fulton met individually with each of the youngsters from Sung Ae Won, and presented each with a blanket purchased with orphanage committee funds. The FED-sponsored orphanage is located southeast of Seoul near Icheon.

The afternoon's second visitor was more than flesh-and-bone. Red light flashing, the 501st Support Group Fire Department paid tribute to the children, and entertained as well. The Yongsan firemen chauffeured groups of the Seoul visitors around the area aboard a shiny fire truck. Even a few adults managed to slip aboard undetected.

Here's the beef, chicken, and hot dogs prepared by Sue Christiansen, Paek Kil Hyon, Linda Maples and Elizabeth Markowski.

The three legged race was one of the many games which brought smiles to the kids that day.

Junior fire fighters . . . well maybe, but this day the children were treated to a ride by the Area III Fire Department.

Sit on the balloon, pop it, and run back to the finish line. Ouch! and lots of fun.

Col. Larry Fulton takes a farewell group photograph of "his" children.
What did you SAEDA?

By Capt. Lynn Clemons
Security Officer

Espionage is the act of obtaining, delivering, transmitting, communicating, or receiving information in respect to the national defense with an intent or reason to believe that the information may be used to the injury of the United States or to the advantage of any foreign nation. The offense of espionage applies in times of war or peace. Whoever knowingly or unlawfully has possession of, access to, control over, or is entrusted with, information dealing with national defense, which information the possessor has reason to believe could be used to the injury of the United States or to the advantage of any foreign nation, willfully communicates or transmits such information to any person not entitled to receive it is guilty of espionage under the statute set forth in section 792-796, Title 18, United States Code. So what did you SAEDA lately? (Subversion And Espionage Directed Against the Army)

A careless person, a loose talker, the disgruntled employee, and the braggart have probably been more responsible for unauthorized disclosures, or for compromising classified information than for any other known causes or reasons for committed security violations or compromises.

When we talk about espionage the way it is today, we are talking about people who are very well-educated, highly trained, equipped, and supported. They use modern equipment and techniques in order to arrange for illegal entries, cover stories, meeting places, dead drops, communication systems, recruiting and so forth.

An enemy agent will not advertise the fact that he is a spy and does not always have to recruit you in order to gather intelligence information that will be of value to him. As a matter of fact, a very casual conversation over a few friendly drinks, can sometimes loosen the tongue and be a revealing or productive as going through a file drawer full of classified documents, when you're looking for specific information.

Being more specific, the ultimate goal of North Korea is to place all of the Korea peninsula under communist rule. With this intention, North Korea actively engages in efforts to subvert the Republic of Korea populace, undermine United States-Republic of Korea relations, and collect military information. To achieve these aims, North Korea utilize direct infiltration of agents from North Korea, infiltration of agents from third countries, and in-country recruitment and training of Republic of Korea residents as agents. The primary aim of these agents is to collect military information on the Republic of Korea. However, it may be presumed that information on United States military forces are of value to North Korea and therefore will be solicited and passed on by these agents. This information is gathered through different sources which may include bar-girls and bartenders employed at clubs frequented by United States personnel. Very often, information of intelligence value is unwittingly discussed with the above mentioned individuals who in turn unwittingly pass the information on to a friend or acquaintance who may have contacts with or may be an espionage agent.

Therefore, your responsibility as a member of the United States military community is to avoid discussing duty related information with unauthorized individuals, including girlfriends, boyfriends, neighbors, and casual acquaintances. Furthermore, you are relied upon and required to report any suspicion you may have of espionage against United States Forces. Any person or activity which seems suspicious to you should be reported immediately. Do not worry whether or not your suspicion will turn out to be true or false or appear foolish. If you have a suspicion, report it to your Security Officer. Never attempt to investigate on your own. This is a difficult and possibly dangerous undertaking that should be done only by trained investigative personnel. If you are approached for information, do not say yes or no to the request, but ask for time to think about the matter. Be observant and be able to supply the identity or an accurate description of the person who made the approach, the nature of the information sought, circumstances of the meeting and arrangements made for the later meeting. Since the United States Government is committed to aid the Republic of Korea in the defense against its enemies, any espionage directed against United States Forces is harmful to the overall security of the Republic of Korea. Conversely, espionage against the Republic of Korea can directly effect our military forces and undermine our security.

FED softball team winning another season

By Dave Roden

FED softball team is enjoying another winning season. To cheers of "How do they do that?" they continue to do that. Powerful — no, awesome — no, scrappy maybe.

FED is standing alone in second place in the Yongsan Company Level League standings with a record of 10 wins and 2 losses. So far the season has been highlighted by late inning heroes to snatch 7 victories from what seemed to be certain defeat.

Handling the early season batting chores is perennial doormat and weak hitter Scott McCue. According to the veteran coach, "Scotty should shine shoes, but this year the man's on fire." Additional firepower is supplied by Mike Deno and Dennis Fischer. Steady defense has been supplied by . . . Uh . . .

Come and see for yourself.

FED has two bowling leagues

The FED Yongsan bowling league, began last month, is a big success thanks to it's members. Quentin Walsh shows the way to a strike. The game begins every Thursday evening at Yongsan Bowling Center. Anyone interested in playing, call Shelley Shires, secretary at 409.

The FED East Gate bowling league began in 1979 with 16 players who made up 4 teams. They met for the 300th week on April 30. Now, the league has more than 65 employees making up 12 teams. They bowl every Wednesday evening at the 1st Bowling Center near East Gate. Anyone interested in playing, call Chon Kyong Ho, Secretary at 369.
Dear sir:

I am writing in response to your request for additional information. In block number 3 of the accident reporting form, I put "poor planning" as the cause of my accident. You said in your letter that I should explain more fully, and I trust that the following details will be sufficient:

I am a bricklayer by trade. On the day of the accident, I was working alone on the roof of a new six story building. When I completed my work, I discovered that I had about 500 pounds of brick left over. Rather than carry the bricks down by hand, I decided to lower them in a barrel by using a pulley which fortunately was attached to the side of the building, at the upper floor.

Securing the rope at ground level, I went up to the roof, swung the barrel out, and loaded the brick into it. Then I went back to the ground and untied the rope, holding it tightly to insure a slow decent of the 500 pounds of bricks. You will note in block number eleven of the accident reporting form that I weigh 135 pounds.

Due to my surprise of being jerked off the ground so fast, I lost my presence of mind and forgot to let go of the rope. Needless to say, I proceeded at a rather rapid rate up the side of the building. In the vicinity of the third floor, I met the barrel coming down. This explains the broken collarbone and fractured skull.

Slowed only slightly, I continued my rapid ascent, not stopping until the fingers of my right hand were two-knuckles deep into the pulley.

Fortunately, by this time I had regained my presence of mind and was able to hold tightly to the rope in spite of my pain.

At approximately the same time, however, the barrel of bricks hit the ground -- and the bottom fell out of the barrel. Devoid of the weight of the bricks, the barrel now weighed approximately fifty pounds.

I refer again to my weight in block number eleven. As you might imagine, I began a rapid descent down the side of the building. In the vicinity of the third floor, I met the barrel coming up. This accounts for the two fractured ankles and the lacerations of my leg and lower body.

The encounter with the barrel slowed me enough to lessen my injuries when I fell onto the pile of bricks and, fortunately, only three vertebrae were cracked.

I am sorry to report, however, that as I lay there on the bricks in pain, unable to stand, and watching the empty barrel six stories above me, I again lost my presence of mind ...

I LET GO OF THE ROPE ...

미육군공병단 제211주년 창단기념일

임일 공병단이 두가지 책임인 전쟁의 임무와 국가의 주요를 보장하는 임무를 강하게 느끼는 특별한 기간을 갖는다면 우리도 이번달이 해당한다고 말 할 수 있다.

5월 14일은 미육군공병단 211주년 기념일이고 16일은 공병단발상 211주년이 된다. 이는 우리 공병단 22일은 흉목투수병이 제정된 50년 기념일이고 22일에는 "공병단"연대의 창설행사가 베로니아주 Belvoir요새에서 진행된다.

미육군과 공병단의 역사는 곧 미국의 역사와 그 역할을 함께하고 있다. 위성만전군이 일어난 아산사태의 Richard Greidy 초대 공병단장관은 포로와 평소의 전개에 헌신하여 많은 전복을 갖고 있었다. 위성만전군은 독립군을 위해 비로소 지상이 필요하였을 때

미육군이 창설된 이유는 공병단의 역할을 보장하기 위해 있었다. 공병단의 역할은 공병탄약 소지와 보안을 수행하기 위해 있었으며, 공병단은 여전히 우리군의 주요 역할 중 하나이다.

이번달에는 25,000명 이상의 현역 공병 장병과 70,000명 이상의 훈련 및 투병에 참여한 병원에 대한 찬양의 영문을 통해 받을 것이다. 이 메시지는 공병단에 대한 훈련생과 전투사진의 전개를 보여주고 있다. 우리 공병단은 앞으로도 상호상생의 정신을 보장하기 위해 노력하여 올바른 미래를 위해 노력하고 있다.

Ronald Reagan

Fourth of July Message
From the President

불패의 독립기념일은 더욱 의미가 있으며, 오늘 7월 4일 뉴욕항

에서는 서로의 독립기념일의 역사적 성격에 대해 생각한다. 이날

은 지난 2년간의 인도인의 민주주의를 보장한 이러한 나날이 되는

하루를 읽어주는 영광스러운 경사이며, 이는 우리가 만들어낸 독립

의 정신을 보여주고 있다. 우리는 자유로운 나날을 보여주고 있으며, 또한 자유의 여신은 이들에 대한 평화의 희망을 보여주고 있다. 우리는 210주년 뉴욕기념일을 맞이하여 더욱 나날의 정신을 보여주고 있으며, 또한 자유의 여신을 보고자 하는 전쟁의 사람들에게 희망의 희망을 보여주고 있다.

이런 7월 4일을 맞이하여 본인은 희망적 우리국민의 독립정상이

된 자산은 단연히 생활하고 있으며, 나라의 모든 민족은 여전히 전통적에 대한 상호를 보여주고 있으며, 우리는 이날에 대한 우리의 희망을 보여주고 있다.

Mike Maples

제211주년 공병단 기념행사

 cosine의 자유와 투표의 중요성에 대한 결론을 내리며, 우리가 이날에 가져온 경험을 보여주고 있다. 우리는 이날에 대한 우리의 민족의 영광을 보여주고 있다. 우리는 이날에 대한 우리의 희망을 보여주고 있다.
