To the Great Team of the Far East District and our entire Team of Teams,

For the U.S. Army Corps of Engineers, and many other government organizations, October is a month of new beginnings. It is the first month of the new fiscal year and with a new year comes new budgets and new projects and programs. And as we closed out the 2011 fiscal year, thanks so much for all who were so instrumental in our year-end closeout process – one of our best ever! Your efforts have provided our Customers and the Republic of Korea great opportunities for the 2012 fiscal year.

October is a wonderful month for many reasons, one of which is the kickoff of the Combined Federal Campaign. The mission of the CFC is to promote and support generosity through a program that is employee focused in providing all federal employees the opportunity to improve the quality of life for all. The CFC is the world’s largest and most successful annual workplace charity campaign, with more than 200 CFC campaign charities recognized throughout the international community to help raise money for a great cause.

Also during the month of October we are excited to continue to celebrate Hispanic Heritage Month which is from September 15 to October 15. The theme, “Many Backgrounds, Many Stories…One American Spirit,” is a powerful one. This theme so embodies the diversity within our Nation, and by extension, our District. October is also dedicated to people with disabilities as National Disability Employment Awareness Month. This year’s theme is Profit by Investing in Workers with Disabilities. We must continue to recognize, honor and invest in those with disabilities.

As we continue to “Build Culturally Strong” in our District Family and Community, we are forever reminded of the great diversity of People who enrich our work place and our lives and continue to allow us to grow stronger each and every day. Borrowing shamelessly from this month’s theme, “Many Backgrounds, Many Stories…One Spirit of Alliance,” describes the attitude we strive to embody. This message of diversity and unity speaks to the very soul of our mission here in Korea. Thank you all for being who you are – you make the world a better place every day.

To our great Alliance – Katchi Kapsida!
To our great Corps – Essayons!
One Team Building Strong® in Korea!
The U.S. Army Corps of Engineers, Far East District completed another successful fiscal year; there were a total of 1,137 awards, valued at approximately $248.5 million. There are three major contract types that the Corps executes in the Far East District, Construction Contracts, Architect-Engineer Contracts, and Service Contracts, of these, approximately 67 percent of all dollars obligated is via our construction contracts.

Although construction is FED's largest program area, during Fiscal Year 11, FED executed several unique service contracts, such as the Enhanced Commissioning Services contract, the Construction Site Security contract, and the Re-locatable Building contract. Enhanced Commissioning is a preparatory process whereby a building is readied for operation; this includes a quality assurance process to ensure that the building system performs as intended, and in our situation, it is to support Leadership in Energy and Environmental Design.

Another unique service contract that FED executed was for Construction Security Services; this service is required when we construct any facility that will handle classified information, and will require U.S. security clearance of the guard service; therefore, this is a mandatory service for several of FED's construction contracts.

The re-locatable building contract for the U.S. Army Garrison was another unique service contract. This project required manufacture of pre-fabricated building modules to be shipped from the U.S. and re-assembled on U.S. Army Garrison, Yongsan. With a compressed performance period, and a U.S. security clearance requirement during assembly, the project was delivered on schedule, and received the required building security certification.

FED experienced an exciting FY11, and is looking forward to an exciting and challenging FY12.
Fall is a time of transition. Days are cooler, skies are turning grey and crops are being harvested. Thanksgiving and Christmas is just around the corner and the American football season is in full swing. Summer activities are fading and the chill of winter is on the horizon.

Fall and winter seasons are full of opportunities for celebrating. Football games, extended holiday vacations (a good way to burn up that “use or lose” leave time), and all those end of year and holiday parties. Don’t forget to factor in such things as decreased daylight and the possibility that adverse weather conditions like ice and snow may be on the horizon.

Each day there is less and less daylight. At the peak of summer on June 21 Seoul has about 14 hours of daylight. By Dec. 21 daylight is reduced to about nine hours. November temperature highs are from 44-59 degrees Fahrenheit (6.5-15 degrees Centigrade) and lows from 32-44 degrees Fahrenheit (0-6.5 degrees Centigrade). By the end of December highs are about 38 degrees Fahrenheit (3.5 degrees Centigrade) and lows about 27 degrees Fahrenheit (-3 degrees Centigrade).

Fall is a good time of year to take a few moments to think about upcoming plans and how one can make safer choices and adjust to changing seasonal conditions.

Here are some things to consider:

- Accident reports show that drinking and driving is a lethal combination. Don’t do it! Drinking and driving is never the right answer!
- In 2009 the number of pedestrians killed (2,137) in Korea exceeded the number of vehicle occupants killed (1,978). About half of all pedestrian fatalities occur between the hours of 6 p.m. and midnight.
- Walking versus driving sounds like a good plan, but an intoxicated pedestrian is at tremendous risk. Make a plan. Have a non-drinking friend give you a lift or take a taxi.
- Watch your step! Avoid texting and using the cell phone while crossing the street. Look for slippery conditions that will suddenly be here very soon, such as wet and icy pavement.
- Remember to obey crosswalk signals, but don’t think that because you have the light it is safe to cross! Remember that a vehicle’s stopping distance may be extended due to slippery road conditions. The driver may be distracted or drunk or may choose not to comply with traffic laws.
- Perform preventive maintenance on your vehicle and get ready for winter conditions. Check your vehicle’s batteries and terminals now so they’ll work when cold weather hits.
- Check your vehicle’s tire pressure at least once a month and be sure to use a tire pressure gauge. You can’t tell correct tire pressure by just looking at the tire. Underinflated tires wear out the tire tread prematurely and unevenly, wastes gas, and creates deadly driving situations.
The U.S. Army Corps of Engineers, Far East District along with personnel from the U.S. Naval Forces Korea cut the ribbon on a new Bachelor Enlisted Quarters at Fleet Activities Chinhae Oct. 7.

Rear Adm. William McQuilkin, CNFK, was the senior leader from U.S. Forces Korea at the ceremony.

“This is a real privilege for me. This project represents many good things coming together,” said McQuilkin. “First we are taking care of Sailors.”

The new facility will provide rooms for 32 Sailors built to the latest U.S. Navy standards. The design is two-plus-two, which is each Sailor will share a living area and kitchenette with another Sailor but have individual sleeping quarters.

“Second, we are increasing the number of rooms on this base in order to improve our ability to fight tonight,” said McQuilkin. “This project is a symbol of the generous host nation support the U.S. Navy receives from the Republic of Korea.”

The BEQ was funded by the Korea Ministry of National Defense and provided for the ROK and U.S. combined defense of the peninsula.

Col. Han Bong-wan, Chief of U.S. Forces Korea Construction Management Team, ROK MND, was also present at the ceremony.

“Whenever I visit here, I think that this naval base is very beautiful and has the zest and spirit of the Navy,” said...
Rear Adm. William McQuilkin (left), Commander U.S. Naval Forces Korea, and Cmdr. Don Murray (right), Commander of Fleet Activities Chinhae, take a tour of the new Bachelor Enlisted Quarters Oct. 7. (Photo by Patrick Bray)

Han. “It is an honor to turn over this new BEQ that will give satisfaction and happiness to U.S. Sailors staying in this place for the defense of the Korean Peninsula.”

To officially hand over the facility, Han presented the key to the BEQ to Cmdr. Don Murray, Commander of Fleet Activities Chinhae.

Sam Adkins, Chief of Construction Division, represented FED at the ceremony.

“This shows the unique partnership in place with the Korean government,” said Adkins. “Through host nation funding, U.S. forces are able to get much needed facilities.”

The BEQ was built by Krima Construction Corp. and designed by MM International, LLC. The project engineer was Pak Sam-kun from FED Southern Resident Office.

Robert Slockbower, U.S. Army Corps of Engineers Director of Military Programs, visited the largest military construction program in USACE Oct. 11-16. Slockbower visited the Far East District to learn about Korea transformation and see construction at U.S. Army Garrison Humphreys.

Greg Reiff, Area Engineer of FED Humphreys Area Office, gave Slockbower an aerial tour of USAG Humphreys and pointed out some of the progress that has been made.

Six barracks on the new land have already been completed and handed over to the garrison.

Now the largest projects on site are the three Army Family Housing Towers. On the ground, Slockbower toured the facility with David Talbot, Resident Engineer of the Army Family Housing Resident Office.

The scope is to construct three multi-story family housing apartment towers to accommodate a total of 210 senior non-commissioned officers through field grade officers and their families. There will be 140 three-bedroom units, 52 four-bedroom units, and 18 five-bedroom units. Two of the three towers were designed to accommodate 72 dwelling units and one tower to accommodate 66 dwelling units with modern equipment and appliances fully furnished ancillary facilities such as “tot lots,” multi-age playgrounds, and one underground parking garage connecting the three towers to accommodate 285 vehicles.

Three vehicle maintenance facilities are also under construction. Two are being built by Dongyang Construction and the other one by Hanwha Construction. The Hanwha facility will also include a company operations area.

The 384-unit Senior Leaders Quarters Phase 1 is under construction and scheduled for completion in May 2012. Design for Phase 2 will be completed next year. Once both phases are completed, there will be a total of 1,152 living units that will improve quality of life for unaccompanied senior NCO’s and officers.

Also, pile driving has begun on the new high school and elementary school—the first Yongsan Relocation Program vertical construction project.

Hyundai and the ancient Silla Kingdom

By Patrick Bray
FED Public Affairs

Hyundai sponsored two tours this year designed to introduce U.S. Forces Korea service members and their families to Korean history, customs, culture, and traditions in the southeastern portion of the peninsula.

This particular tour included visits to historic sites of the ancient Silla Kingdom, to include Bulguksa Temple, Seokguram Grotto (cave containing an ancient Buddha), the Cheonmachong Tombs, and Daewangam Park.

The Silla Dynasty was a 1,000 year kingdom and one of the longest in Asian history. It was this kingdom that was eventually able to unify the Korean Peninsula under its own rule in 668.

Silla became a regional leader in its time when its ships sailed far beyond its borders. Silla maintained relations, not only with the other kingdoms of Korea, but also with China, the nomadic groups of North Asia, Japan, and even the far-away countries of West Asia.

Many of the sites of the Silla kingdom such as the Seokguram Grotto and Bulguksa Temple are designated as world cultural heritage sites by the United Nations Educational, Scientific, and Cultural Organization (UNESCO).

King Munmu, the 30th King of the Silla Dynasty, was able to achieve unification of the kingdoms of the Korean peninsula.

During his life, Munmu used to express his desire to become a dragon after his death that would protect this new unified kingdom from its enemies. So, in accordance with his wishes, when the king died he was buried under a great rock in the East Sea. It is said that he was reincarnated into the guardian dragon of Korea.

From then on, people called the rock under which he was buried Daewangam, which means “the Rock of the Great King.” It is located in Yangbuk-myun, Gyeongju in southeastern Korea.
Later, it was said that the spirit of the Queen also became a guardian dragon of the kingdom after she died. The queen dragon flew to Ulsan and submerged herself under a rock there to protect the East Sea. People also began to call this rock Daewangam.

Today, Daewangam Park in Ulsan is home to a lighthouse which helps ships cruise safely through the rough sea. Waves often crash upon the rocks which can give the appearance that there is a dragon in the water. It is told that seaweed does not grow around this rock because of the dragon.

Tourists in this area are often splashed with water as they cross the foot bridge that leads to the rocks, but luckily for the tourists from USFK the sea was calm that day.

However, not far from the rocks, a modern dragon of a different kind has made its home. Ulsan is home to Hyundai Heavy Industries, one of the world’s leading ship manufacturers. HHI built the world’s largest shipyards in Ulsan in 1972. By the 1980’s it was number one in ship orders and construction. Today, it can deliver 100 ships per year from its ten dry docks.

Also located in Ulsan is Hyundai Motor Group’s main assembly plant. Together with HHI, Ulsan was once nicknamed “Hyundai City.”

Hyundai Motors has 6000 dealerships, 24 overseas production bases, and located in 180 countries worldwide.

With its ships and automobiles, Korea has spread its image around the world just like in the ancient days when the Silla kingdom was an influential regional player.
Reaching out in South Africa

By Hailey Baisch

(Editor’s Note: Hailey Baisch, daughter of Lt. Col. Gregory Baisch, Deputy Commander of the U.S. Army Corps of Engineers, Far East District, recently graduated from Seattle Pacific University with a bachelor’s degree in physiology. Currently she is volunteering in South Africa before applying to medical school upon returning to the U.S. Baisch is living with Bob and Joanna Graham who run a children's village for orphans with HIV.)

This morning Joanna and I went to the post office and during our outing Joanna received a phone call that a social worker was waiting for us at the house. He was unable to hang around for us to make it back and so asked us to come by his office at 3 p.m. The only news that we were told was that he believed he had a baby that he could place at our children’s village and wanted to see if we would be willing. We didn’t know if it was going to be a boy or girl, the situation, or the age.

Joanna and I arrived at the social worker’s office at 3 p.m. to be told he wouldn’t be back until 3:30 to meet with us. So we waited and wondered. Around 3:45 he came out with a little bundle in his arms and handed the baby to Joanna as we walked back to his office. The baby was a week and a half-old little girl, born on Sept. 22, who was abandoned at a local hospital. The mother had asked a hospital worker to watch her baby so she could go to the bathroom and never came back to pick up her little girl. This is not an uncommon situation here with many young girls and women unable to take care of their babies. The baby had no name and no family members had come back to claim her. Joanna asked about the age of the mother, but that was unknown as well. Thankfully, the baby as of now is HIV negative and she looks healthy. Our third gogo (Zulu word for grandmother), Minah, will be taking her and was even given the opportunity to name her. She chose Zinhle, which is Zulu for Precious.

The crazy part about the whole day was that the social worker released Zinhle to come home with us today. We had to run to the store in order to get her bottle, formula, etc. Thankfully a donor has been providing diapers and clothes for babies already and so we should be covered on that front for awhile. There is nothing like bringing a baby home unexpectedly but boy are we excited. She is the first newborn the village has received. As in my earlier post, I mentioned that the gogos have gone home with their kids for holiday. This meant that tonight Joanna and I will be on baby duty until Minah arrives tomorrow to go to court to formally become Zinhle’s foster parent.

Here are a few photos of our new little girl. She has a full head of hair and is so sweet and quiet, at least for now. She already takes a bottle quite well, but hates to have her diaper changed. I am in love already which many of you know how much I adore little babies! I just pray that everything goes well in the courts on Wednesday and that she will be here with us to stay.

Read more at her blog haileynbaisch.blogspot.com.

(Right) Zinhle, a baby abandoned at a hospital in South Africa, has been cared for by Hailey Baisch, daughter of Lt. Col. Gregory Baisch, Deputy Commander of the U.S. Army Corps of Engineers, Far East District. Baisch is volunteering in South Africa before applying to medical school.

Engineering Division  

Family Photo from Christmas 2010 in New Jersey  

Hometown: U.S. - Fort Lee, New Jersey  
South Korea - Daegu  

Education: Rutgers, Johns Hopkins and Seoul National University (Currently attending)  

Interesting Facts: I was born and raised in Daegu, South Korea until age 16 and then moved to the States. I had a minor in Japanese and lived in Japan for two years. I climbed Mt. Fuji! Currently, pursuing my doctorate degree at Seoul National University majoring in Environmental Studies. I am not exactly a tree hugger but I hesitate to replace my cell phone with newly released products like the touch phone after studying the impact of electronic waste…  

Love hiking, biking, eating and laughing!  

FED employees try archery at ancient castle  

By Patrick Bray  
FED Public Affairs  

Seoul — Hwaseong Fortress in Suwon was built in the 18th Century and the remaining walls still encircle central Suwon today. Although it was severely damaged during the Korean War, it was able to be reconstructed due to accurate and detailed records made by the engineers who constructed the castle. These documents survived the war.

Chief Warrant Officer 2 Susan Bostick and Elena Pelias from the U.S. Army Corps of Engineers, Far East District practiced their archery skills as they visited the fortress during a U.S. Forces Korea cultural tour.

Bostick and Pelias both found archery to be a little more difficult than it looks.

“I was able to hit the target,” said Bostick. “I think I hit it two times out of ten.”
Veterans Day historically goes back to the end of World War I in 1918 when hostilities ceased on the eleventh hour of the eleventh day of the eleventh month. President Woodrow Wilson declared Nov. 11 as the first commemoration of Armistice Day a year later to honor those who fought in the “war to end all wars.”

The original concept for the celebration was for a day observed with parades and public meetings and a brief suspension of business beginning at 11:00 a.m.

The U.S. Congress officially recognized the end of World War I when it passed a concurrent resolution on June 4, 1926. A later act of Congress made Nov. 11 a legal holiday in 1938 which would be a day dedicated to the cause of world peace and to be thereafter celebrated and known as “Armistice Day.”

Armistice Day eventually became Veterans Day in 1954 after World War II had required the greatest mobilization of U.S. troops in history and American forces had fought communist aggression in Korea. Congress expanded the holiday to honor veterans of these and future wars by striking out the word “Armistice” in the Act of 1938 and inserting in its place the word “Veterans.”

President Dwight D. Eisenhower issued the first “Veterans Day Proclamation” later that year “in order to insure proper and widespread observance of this anniversary, all veterans, all veterans’ organizations, and the entire citizenry will wish to join hands in the common purpose.”

Veterans Day has a lot of meaning for close-knit military communities across the U.S. That also includes the large U.S. veteran community in Korea.

Among all of the U.S. veterans residing in Korea, many are now employed by the U.S. Army Corps of Engineers, Far East District. The District’s tradition of military service covers a time period of 60 years: from the Korean War to today’s Global War on Terrorism.

Editors note: Our sincere thanks for your service also goes out to those who are not listed on page 15.

Students and faculty from three local schools in Pyongtaek visited U.S. Army Garrison Humphreys in October as part of the U.S. Army Corps of Engineers, Far East District’s Good Neighbor Program.

Students from Pyongtaek Girls High School, Chungdam Middle School, and Paengsung Elementary School were able to learn about projects ongoing by FED as well as experience the climbing wall at the Zoeckler Station Gym and lunch at the Red Dragon Inn Dining Facility.

Maj. John Burrescia encouraged the students of Pyongtaek Girls’ High School to consider a future in engineering and noted the current generation of engineers who are employed by FED.

“The U.S. came to Korea to help at first, but now we are receiving help from you to build U.S. Army Garrison Humphreys,” said Burrescia.

To learn more about engineering, Ha Chae-un, an engineer at the Humphreys Area Office and also a Pyongtaek resident, briefed the students about the USAG Humphreys expansion project and showed them a fly-over video highlighting the future garrison.

The briefing included many “fun facts” about the garrison expansion project to help the kids visualize the scope of work to be done including a comparison to a popular amusement park.

*Continued on the next page*
“When finished, U.S. Army Garrison Humphreys will be ten times larger than Lotte World,” said Ha.

Afterwards, the students put on hard hats and braved the chilly wind to view a large portion of the project from an overlook to see firsthand just what the fill site and construction projects look like today.

Members of FED also presented all three schools with about 800 books for each school. The books were collected during FED’s Good Neighbor Program book drive which also received generous support from the National Honor Society at Seoul American High School. The schools will use the books to build an English library.

“We believe that the FED book donation will help students grow emotionally and bring developments to the reading culture,” said Pak Kyong-sin, the principal of Chungdam Middle School. “Students will find dreams and hopes, and gain wisdom and insights in life by reading these books. Also by reading books, students can gain indirect experience.”

The District’s Good Neighbor Program for local students in Pyongtaek, known as “Kids in Hard Hats,” not only introduces students to their local U.S. Forces Korea neighbors but is also a tool for strengthening the Alliance.

“Chungdam Middle School will continue its efforts to be a school that promotes education through books, and raise leaders who will play major roles to help the ROK-US Alliance,” said Pak.
October is National Disability Employment Awareness Month

October is dedicated to people with disabilities as National Disability Employment Awareness Month. This year the theme is Profit by Investing in Workers with Disabilities. There are about 54 million Americans who are unable to work because of their disabilities and unequal opportunities. People with disabilities make up the nation’s largest minority group and any of us can become a member of this group at any time. While serving our country, thousands of service members have become wounded and disabled.

In 1945 Congress had pronounced the first week of October as “National Employ the Physically Handicapped Week” in order to educate America on disability and employment. Seventeen years later in 1962, the name was changed to “National Employ the Handicapped Week” so to include everyone with different disabilities. Finally, in 1988, Congress increased the week to a month and changed the name to “National Disability Employment Awareness Month.”

In the Presidential Proclamation for the anniversary of the Americans with Disabilities Act, President Obama stated, “Generations of Americans with disabilities have improved our country in countless ways. Refusing to accept the world as it was, they have torn down the barriers that prohibited them from fully realizing the American dream.”

During the month of September, James J. Braxton, Sr. the director of Equal Employment Opportunity at U.S. Army Corps of Engineers Headquarters and Anita Naone, EEO officer for the Pacific Ocean Division visited the Far East District for a command orientation visit. During the visit, Braxton took part as the speaker for the EEO Leadership Training. He trained the managers and supervisors of FED and outlying areas on how to establish a positive leadership environment. (FED File Photo)

U. S. Army Corps of Engineers Far East District celebrated Hispanic Heritage Month highlighting the “Many Backgrounds, many stories, one American spirit” Oct. 14. Cpt. Ryan Ortiz, Intelligence Weapons Officer, 51st Fighter Wing, Osan Air Base attended the event as a guest speaker and shared his experience as a Hispanic American. There was a Hispanic Heritage slide presentation and samplings of ethnic food. (FED File Photo)
Fiscal Year 2012 Union Board Meeting

On Oct. 7 the annual board meeting was held with attendance of the newly appointed board members as well as the union representative and executive board members.

The meeting started off with opening remarks from Yi Won-son, the union representative. The meeting proceeded with the introducing of newly appointed board members, fiscal year 2011 year-end closeout, financial audit, and concluded the meeting after reviewing and approving the FY 2012 budget. Following the meeting, Nam Hyo-shin, Seoul branch manager for U. S. Forces Korea’s Korean National Union, gave congratulatory remarks and gave a brief on this year’s pay negotiation. There had been six meetings until now and have made negotiations for a 5.1 percent increase in the current pay. The decision is waiting for approval and is currently in OPM to process. He added that the union executive board is requesting that the pay increase be retroactive from July 1, 2011 and have asked for continued support and encouragement from the members.

After dinner, Yi made welcoming remarks. Following, Col. Don Degidio, FED Commander thanked the members for their continuing efforts and then talked about the importance of the annual business plan and developing a professional society. He is considering holding other activities for better team building. So far there will be a golf scramble in November and a bowling game in December. Degidio encouraged members to recommend ideas on team building.

Degidio and Jon Iwata, FED Deputy District Engineer thanked the Korean employees for their effort. They emphasized that each person is an important part of the team, and it’s important to remember this to build a stronger team.

We go together! “Kachi Kapsida”

My Plan

I help the Corps Build Strong in Korea by...

• Speaking better English so I can communicate with my U.S. counterparts proficiently
• Building strong relationships with my co-workers
• Exerting my best efforts to work responsibly
• Being flexible and enjoying the work I do

My Face

I am a key person in the Corps by...

• Fun things I do play with my family like badminton and yoga
• Calling my elderly mother and checking on her condition and sending warm letters to my lovely daughter and son
• Special cooking for my family every weekends
Nagy Habachiy
Engineering

My Plan

I help the Corps Build Strong in Korea by...

• Applying modernized technology and inventions into project designs to make it suitable to fit in our culture
• Performing my duty honestly and thoughtfully to renovate project design weakness
• Facilitating project team by solving technical problems as fast as possible with ideal and simple ways
• Providing scientific advice and new ideas supported by field experience to design team and colleagues

My Face

I am a key person in the Corps by...

• Participating in sports tournaments (Billiard, Bang-bong, Chess)
• Sharing the love of God and Christian believes with the people and friends from different culture by leading a bible study
• Travelling and cruising with my family all over the world
• Enjoying reading science books & drawing nature arts
My Plan

I help the Corps Build Strong in Korea by...

• Fulfilling my task enthusiastically as a civil engineer in Geotechnical and Environmental Engineering Branch
• Developing and improving communication skills and working relationships with people
• Improving technical skills for my current position by working towards professional certificates and on-the-job training

My Face

I am a key person in the Corps by...

• Enjoying life in Korea with new friends I make daily
• Visiting my family every week and spending quality time with them
• Fishing, skiing, and listening to music
• Getting back in touch with friends and family I knew as a kid before immigrating to the States

October is deep into the NFL season, NBA Basketball will be picking up in only a few weeks, Major League Baseball will reach an exciting conclusion with the World Series, and don’t forget Korea Professional Baseball either. What an exciting time of year to be a sports fan! Far East District employees have the opportunity to support their team on Fridays by wearing their favorite sports jerseys. Here are just a few of our great employees sharing their unwavering team spirit.

최고의 국동 공병단 팀과 모든 팀들에게

10월은 우리 공병단 그리고 다른 공무 기관들의 새로운 시작을 알리는 달입니다. 이번 달은 새로운 회계연도를 시작하는 첫번째 달이며 새로운 예산 집행과 새로운 프로젝트 및 프로그램을 시작하는 달입니다. 2011년 회계연도를 무사히 마칠 수 있도록 도와주신 여러분들께 감사를 드립니다. 현재까지 있었던 일관 보고 중 최고였습니다. 여러분의 노력으로 2012년도에도 우리 공병과 대한민국에 최고의 기회를 제공할 수 있을 것입니다.

이번 달이 끝은 달인데는 몇 가지 마무리가 되었습니다. 가장 먼저, UTC 연합 캠페인 (CFC)에 관여하는 달이라는 것입니다. CFC는 미국 공무원들을 대상으로 시행되는 자선 프로그램으로 공무원들에게 기부의 기회를 제공해 줍니다. 도움이 필요한 사람들의 삶의 질을 개선하는데 사용되고 있습니다. CFC는 세계에서 가장 성공적인 헌부 규모의 가장 대자선 캠페인으로 약 200개가 넘는 보급 활동이 전세계에서 이뤄지고 있습니다.

이번 달이 끝은 또 다른 이유는 런던아메리카 문화의 달(9월 15일~10월 15일) 이기 때문입니다. 이번 문화의 달 주제인 “다양한 문화적 배경과 역사를 가진 및 많은 문화의 영원은 하나다”는 강력한 의지를 담고 있습니다. 이 주제는 미국의 다양성을 나타내고 있지만 좀 더 확장하자는 우리 국동공병단에도 적용되는 주제입니다. 10월은 또한 장애를 가진 사람들을 위한 달이기도 합니다. 본 해의 주제는 장애를 가진 사람들을 위한 티켓을 가치는 것이라는 것입니다. 장애에 대한 인식을 세울 때 고 그룹을 존중하며 그들은 위험한 티켓을 계속 해 나가야 합니다.

국동공병단의 “문화 편평 강화”를 실천하면서 우리는 다양한 문화를 가진 사람들이 우리의 일터와 생활을 풍부하게 해 주고 우리 공병단을 훨씬 더 강하게 해 주고 있다는 것을 다시 한번 생각하게 됩니다. 이번 문화의 달 주제를 인용하자면 “다양한 문화적 배경과 역사를 가졌지만 우리는 하나의 동맹이다”라는 말을 할 수 있을 것 같습니다. 다양성과 화합의 중요성을 강조하는 이 해체는 한반도에서의 우리 공병단의 임무를 잘 나타내 주고 있습니다. 하루 하루 더 나은 세상을 만들어 주고 계셔서 여러분께 감사드립니다.

우리의 최고의 동맹에게 - 같이 감사하다!
우리의 최고의 공병단에게 - 예세이온!
한반도의 강한 건설을 수행하는 하나의 팀!
Serve to honor your country. Give because you care.

Give through the Combined Federal Campaign-Overseas and help those in need in overseas military communities, across the nation and around the world. Your contribution is a vital source of support to more than 2,400 charitable organizations.

Your opportunity to help begins 3 October.

The CFC drive runs from Oct. 3 to Dec. 2.
Please contact Division key person or Bok Yoon, Far East District Combined Federal Campaign Overseas coordinator at 721-7076 for more information.
