New employment initiative targets Far East Region military spouses

Servicemembers are expected to move several times throughout their military career, with their family members accompanying them to duty stations all across the world. Being able to provide job opportunities and career resources for servicemembers’ spouses has become a priority in the Far East Region.

The Military Spouse Hiring Initiative is a new program that will allow military spouses to meet one-on-one with a local human resources (HR) representative to review their qualifications and receive feedback and career guidance.

Stephanie Nishimori, a Civilian Personnel Advisory Center (CPAC) HR assistant, leads this program and as a military spouse herself, understands the importance of this initiative.

“Military spouses and their families don’t always come to Korea or the Far East Region as a whole because many of them are concerned about job opportunities,” said Stephanie. “So what we are trying to do is expedite hiring processes for spouse hiring and for Korea to be the assignment of choice. We are working to provide our spouses with enough opportunities to get work that they’re qualified for and that they enjoy doing to keep them happy while they’re overseas.”

Building Strong in Korea!

New employment initiative targets Far East Region military spouses

Continued from Page 1

Nishimori went on to state that most families are assigned here for two years, which is a long time to be out of work and can cause stress among the family unit.

Prior to introducing this initiative, the military spouse non-competitive hiring process was and still is a system that allows spouses to be prioritized for jobs based on spousal preference. However, the new initiative streamlines the process and ensures that spouses have the proper qualifications for potential jobs opportunities.

“It’s very much the same program, except now, spouses are able to come in and talk with any of us and get some feedback on their resume,” said Nishimori. “We are actually sending the resumes to the HR specialists that have available positions.”

Nishimori went on to state that the HR office can actually appoint a spouse to a hiring manager if they think they’re a good fit for a position.

“The ultimate idea is to get spouses hired faster,” said Nishimori.

According to Nishimori, in the CPAC office alone they have hired 16 military spouses within the last year which she said is a significant number in an office of 40 personnel.

As a military spouse, Nishimori stated that she enjoys being the lead for this program and assisting others to find employment. She shared that it wasn’t a fast process for her when arriving to Korea, and she’d like to prevent others from being delayed with securing a job. Nishimori also stated that there’s a negative perception among the spouses in regards to finding a job while being abroad.

“Being able to be on the forefront and let spouses know that I have been there and I understand is an important aspect of this program,” said Nishimori. “Let’s work through this together.”

Nishimori stated that it’s important to note, when spouses are appointed through this program it is a temporary term appointment up to 18 months, but they are not losing military spouse preference.

“They are able to keep applying to a permanent position,” said Nishimori. “It also gives them the opportunity to work with the hiring manager to potentially secure a permanent position.”

Penny Ferguson, a U.S. Army Corps of Engineers (USACE), Far East District (FED) workforce management specialist, has been a military spouse since 2010. She has been able to secure employment in most places where her husband has served.

Prior to working at the FED, Ferguson was located at Fort Campbell, Kentucky and decided to use the leave without pay option prior to her family relocating to Korea. This option allows her computation time for retirement to stay within the government system.

“It helps tremendously,” said Ferguson. “As long as you are picked up in six months you still keep your service comp (computation) dates.

Although Ferguson was hired as already being a government employee, she stated that she’s excited about the new hiring initiative and wants to learn more.

“When you’re moving duty stations from CONUS (continental United States) to OCONUS (outside the continental United States), and vice versa, it’s hard to really find out what is available,” said Ferguson. “Knowing that when you get here, you can reach out to CPAC is great.”

Military spouses who are interested in employment and would like more information about this program can make an appointment or walk-in directly to the CPAC office located at Camp Humphreys.

SEPTEMBER 2019
Yi Tong-hui, a contract specialist, has been an employee with the U.S. Army Corps of Engineers, Far East District, for the past 27 years but has decided to retire after a total of 40 years of service with the U.S. and Republic of Korea government.

Yi initially started working as a procurement specialist in 1979, after getting married and finding out some of the benefits for working with the government.

“I found out that government service offers Saturdays off unlike other companies,” said Yi. “So after my honeymoon I began my first job with the U.S. government.”

The highlights of Yi’s career covers the areas from Yongsan to Pyeongtaek. She went on to describe a few of her career highlights with the FED.

“Initially I was the only contract specialist and I had a heavy workload due to fraud recovery,” said Yi. “As a construction contract specialist I was in charge of all of Yongsan area. My contracts built the Yongsan Theater, USFK headquarters, Child Development Center and the elementary school. When I was walking around Yongsan and sometimes we would have mandatory training inside theater, I felt very good. It made me proud of my job to say that this is my project.”

Yi became a bit emotional when talking about retirement as she wants to continue to work, however, her husband is ill and she wants to be there to take care of him.

“I really enjoy and love FED,” said Yi. “We are an engineering organization but it is very human focused. I always feel like a corps of engineers’ member.”

Camp Humphreys was once a small military installation, but now has grown from 1210 acres to 3528 acres due to the land development and utility infrastructure development (LDUI) plan. Yi was assigned to this project, which she stated, lasted more than 10 years.

“When the project started with site orientation it was all countryside,” said Yi. “From time to time, I would come down to Pyeongtaek to look at my project’s progress. I am really happy with what we have accomplished and continue to accomplish every day.”
The U.S. Army Corps of Engineers, Far East District, continues its work to improve and replace the existing 9000 ft. Osan Air Base runway. The repair of the inside runway was awarded on Sept. 30, 2016. Osan holds the Air Force’s oldest runway, built in 1952, and has supported countless operations from the Korean War to today. (Photos by Steven Haselman)
Pyeongtaek, which is FED’s new home, is also my hometown. My birthplace, Paengseong-eup Geunnaeri, is just 1 kilometer away from our office. This is where I was born. When I was young I could always see airplanes and numerous parachutes that fell from the sky. At night, lights circled the sky.

To me Pyeongtaek is a familiar name. Pyeongtaek was given its name for its numerous flat plains, 100 meter altitude and its ponds. Before the Asan Seawall was built, water used to flow into the Anseong River, and boats came into Dunpo and Gunmun Bridge. After the seawall was built we could no longer see the boats, but Pyeongtaek was free from flood damage and there is always enough water to raise agriculture during droughts. Pyeongtaek is famous for growing quality rice. Pears and other fruits are also known agricultural products of Pyeongtaek. Since 2000, Pyeongtaek is slowly trying to end its agricultural focused era and make its big change.

U.S. Forces Korea base expansion, Samsung, LG and other big companies are starting the change and Pyeongtaek harbor is becoming the central logistics center. Also, new high-rise apartments are being built inside the city. Although the city still lacks public transportation and infrastructure, I look forward to watching the changes of FED’s new home and my hometown becoming an even better city than Seoul in the future.
September is National Preparedness Month
During a disaster is no time to make a plan. Think ahead and be prepared.

Ready ... or Not? is a call to action for leaders, Soldiers, Army Civilians and Family members to assess their readiness for what lies ahead - both the known and unknown.

Throughout our professional and personal lives, events happen all around us. We are often able to shape the outcome of those events, but many times we’re not. Navigating life’s challenges is all about decision-making.

So are YOU ready ... or not?
